- **Oracle Cloud Solutions** – Financials Cloud, Project Portfolio Management, EPM, HCM, CX Cloud, SCM Cloud
- **RPA Technologies** – PAD, Automation Anywhere, UiPath Development

At Epicbliss, our team of **25+ highly** skilled developers brings deep expertise across a wide range of modern technologies,

Our capabilities in power Automate

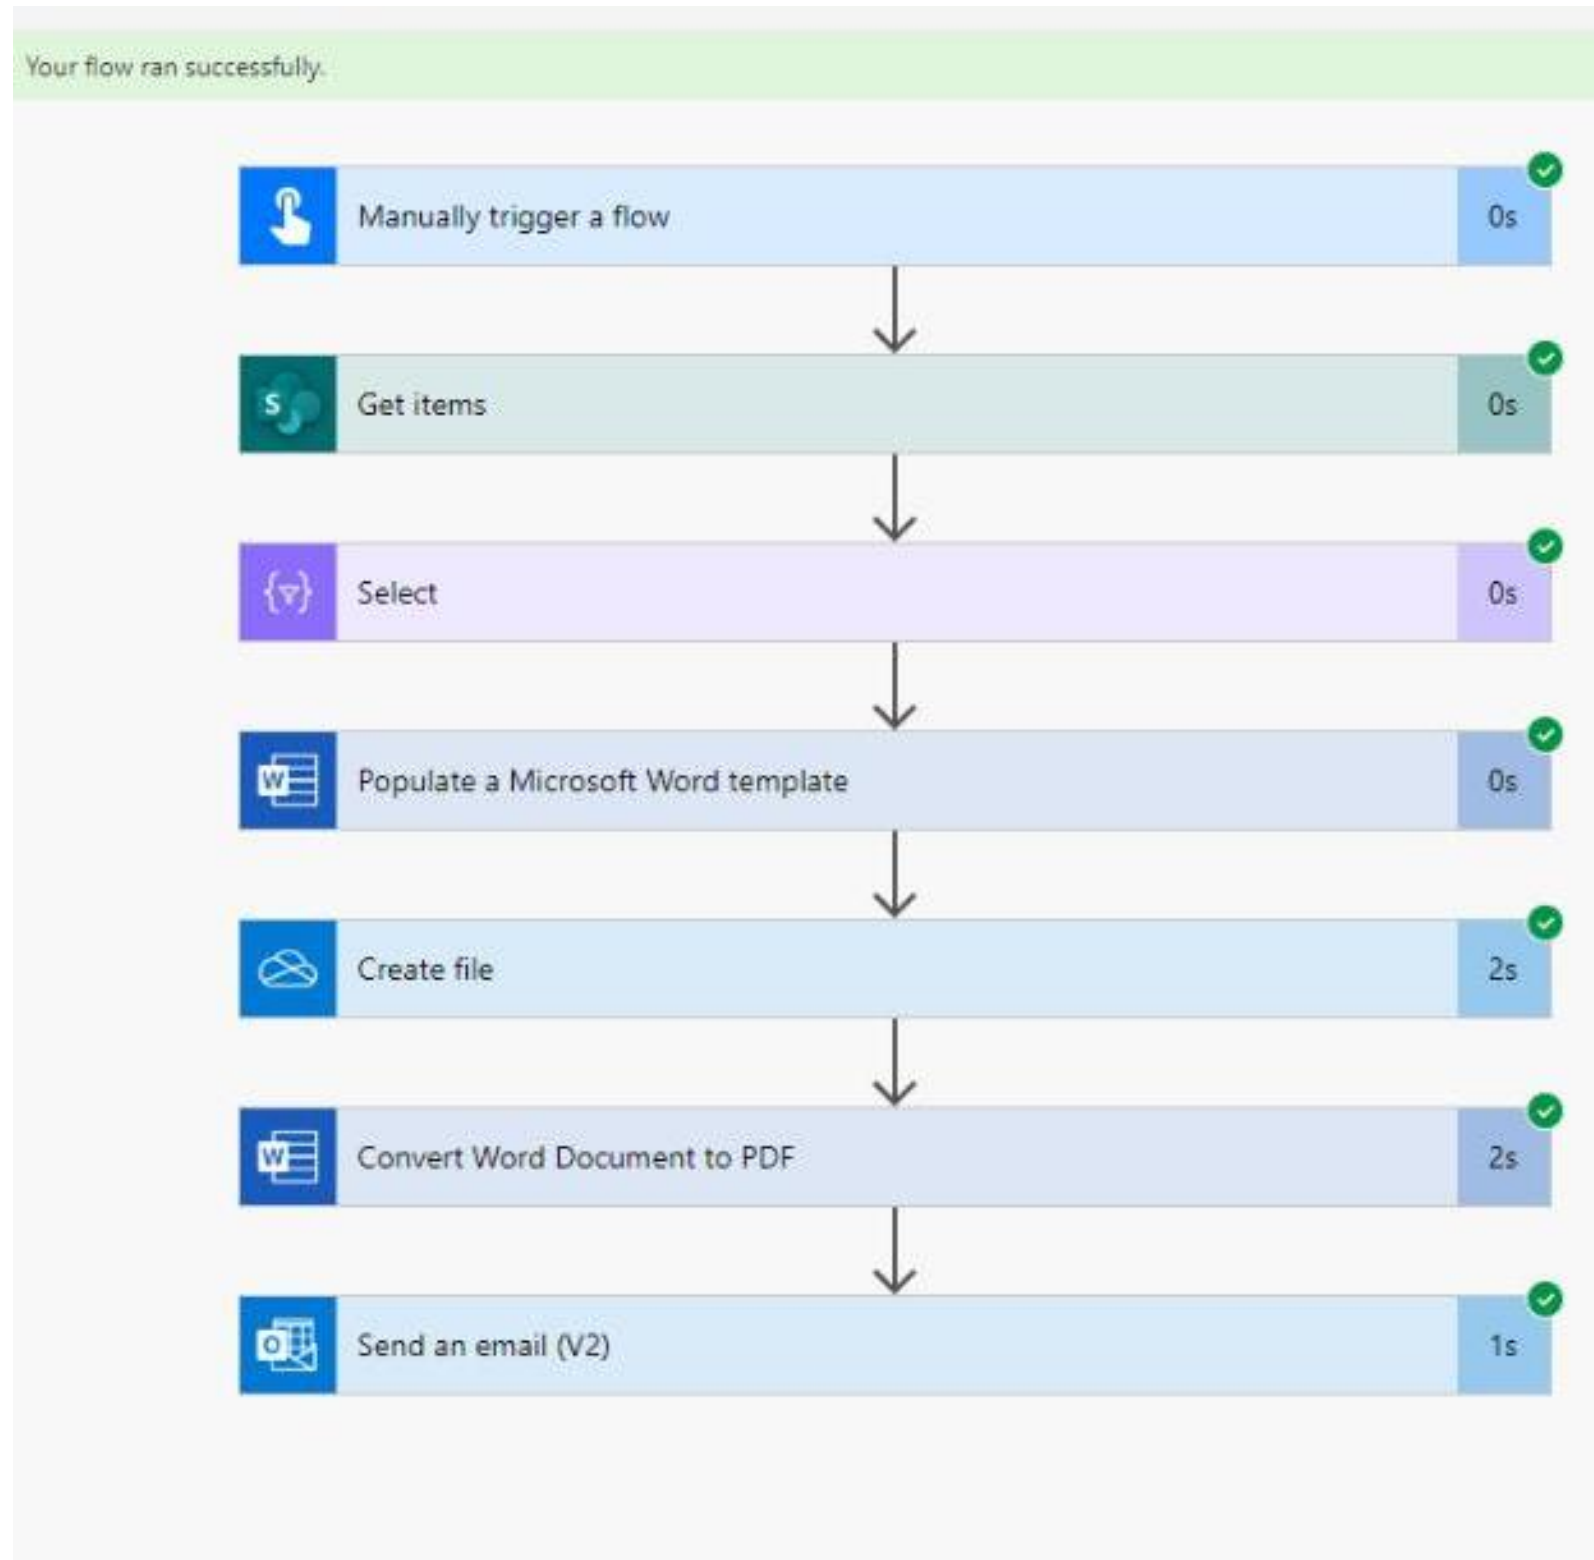

At Epicbliss, we unlock the full potential of Power Automate to streamline workflows, eliminate manual tasks, and enable seamless process automation — accelerating business efficiency with low-code intelligence.

Our Power Automate Capabilities Include:

- ✓ **End-to-End Workflow Automation** – Designed and deployed automated flows for approvals, reminders, escalations, and document routing
-  **Scheduled & Triggered Flows** – Built event-driven and time-based automations that respond instantly to business actions
-  **Robust Connector Integration** – Connected over 300 services including SharePoint, SQL, Teams, Outlook, and custom APIs
-  **Process Intelligence** – Used process mining and analytics to optimize flow performance and identify automation opportunities
-  **AI-Powered Automation** – Integrated AI Builder for intelligent document processing, sentiment analysis, and data classification
-  **Secure & Compliant** – Enforced data loss prevention (DLP) policies and role-based access to ensure safe and compliant automation
-  **Cross-Platform Integration** – Delivered unified workflows that span across cloud, on-premises systems, and third-party platforms

Automate smarter with Epicbliss — where efficiency meets innovation through Power Automate.

Project 1: Invoice Generation and Approval Workflow

A Power Platform solution to automate voucher creation, invoice generation, and multi-level approval workflows, including reminders and archival.

Key Features:

-  SharePoint List used for voucher data entry and logging
-  Invoices auto-generated dynamically from templates based on voucher data
-  Multi-user approval process with rejection/rework handling
-  SharePoint Document Libraries used to store and organize documents
-  Automated reminder flows trigger daily email notifications to approvers

Project 2: Project Task Reporting & Reminder System

A Power Platform solution built to enhance visibility of tasks and automate daily and monthly project reporting for team members and leadership.

Key Features:

-  SharePoint List for task and project data entry with user-friendly structure
-  Personalized OOTB dashboards showing assigned tasks and project info
-  Daily automated email summaries of pending, due, and upcoming tasks via Power Automate
-  Monthly report generation based on task status, project, and user roles

Project 3: Leave Approval System

A streamlined PowerApps-based solution for managing employee leave requests and approvals with real-time leave balance updates.

Key Features:

-  Employees apply for leave through the app, triggering manager notifications
-  Manager approval automatically updates the employee's leave balance
-  Different leave types configured with specific deduction rules from total balance

Project 4: MS Forms to SharePoint Integration

Automated solution to capture Microsoft Forms responses and store them in SharePoint with custom logic and traceability.

Key Features:

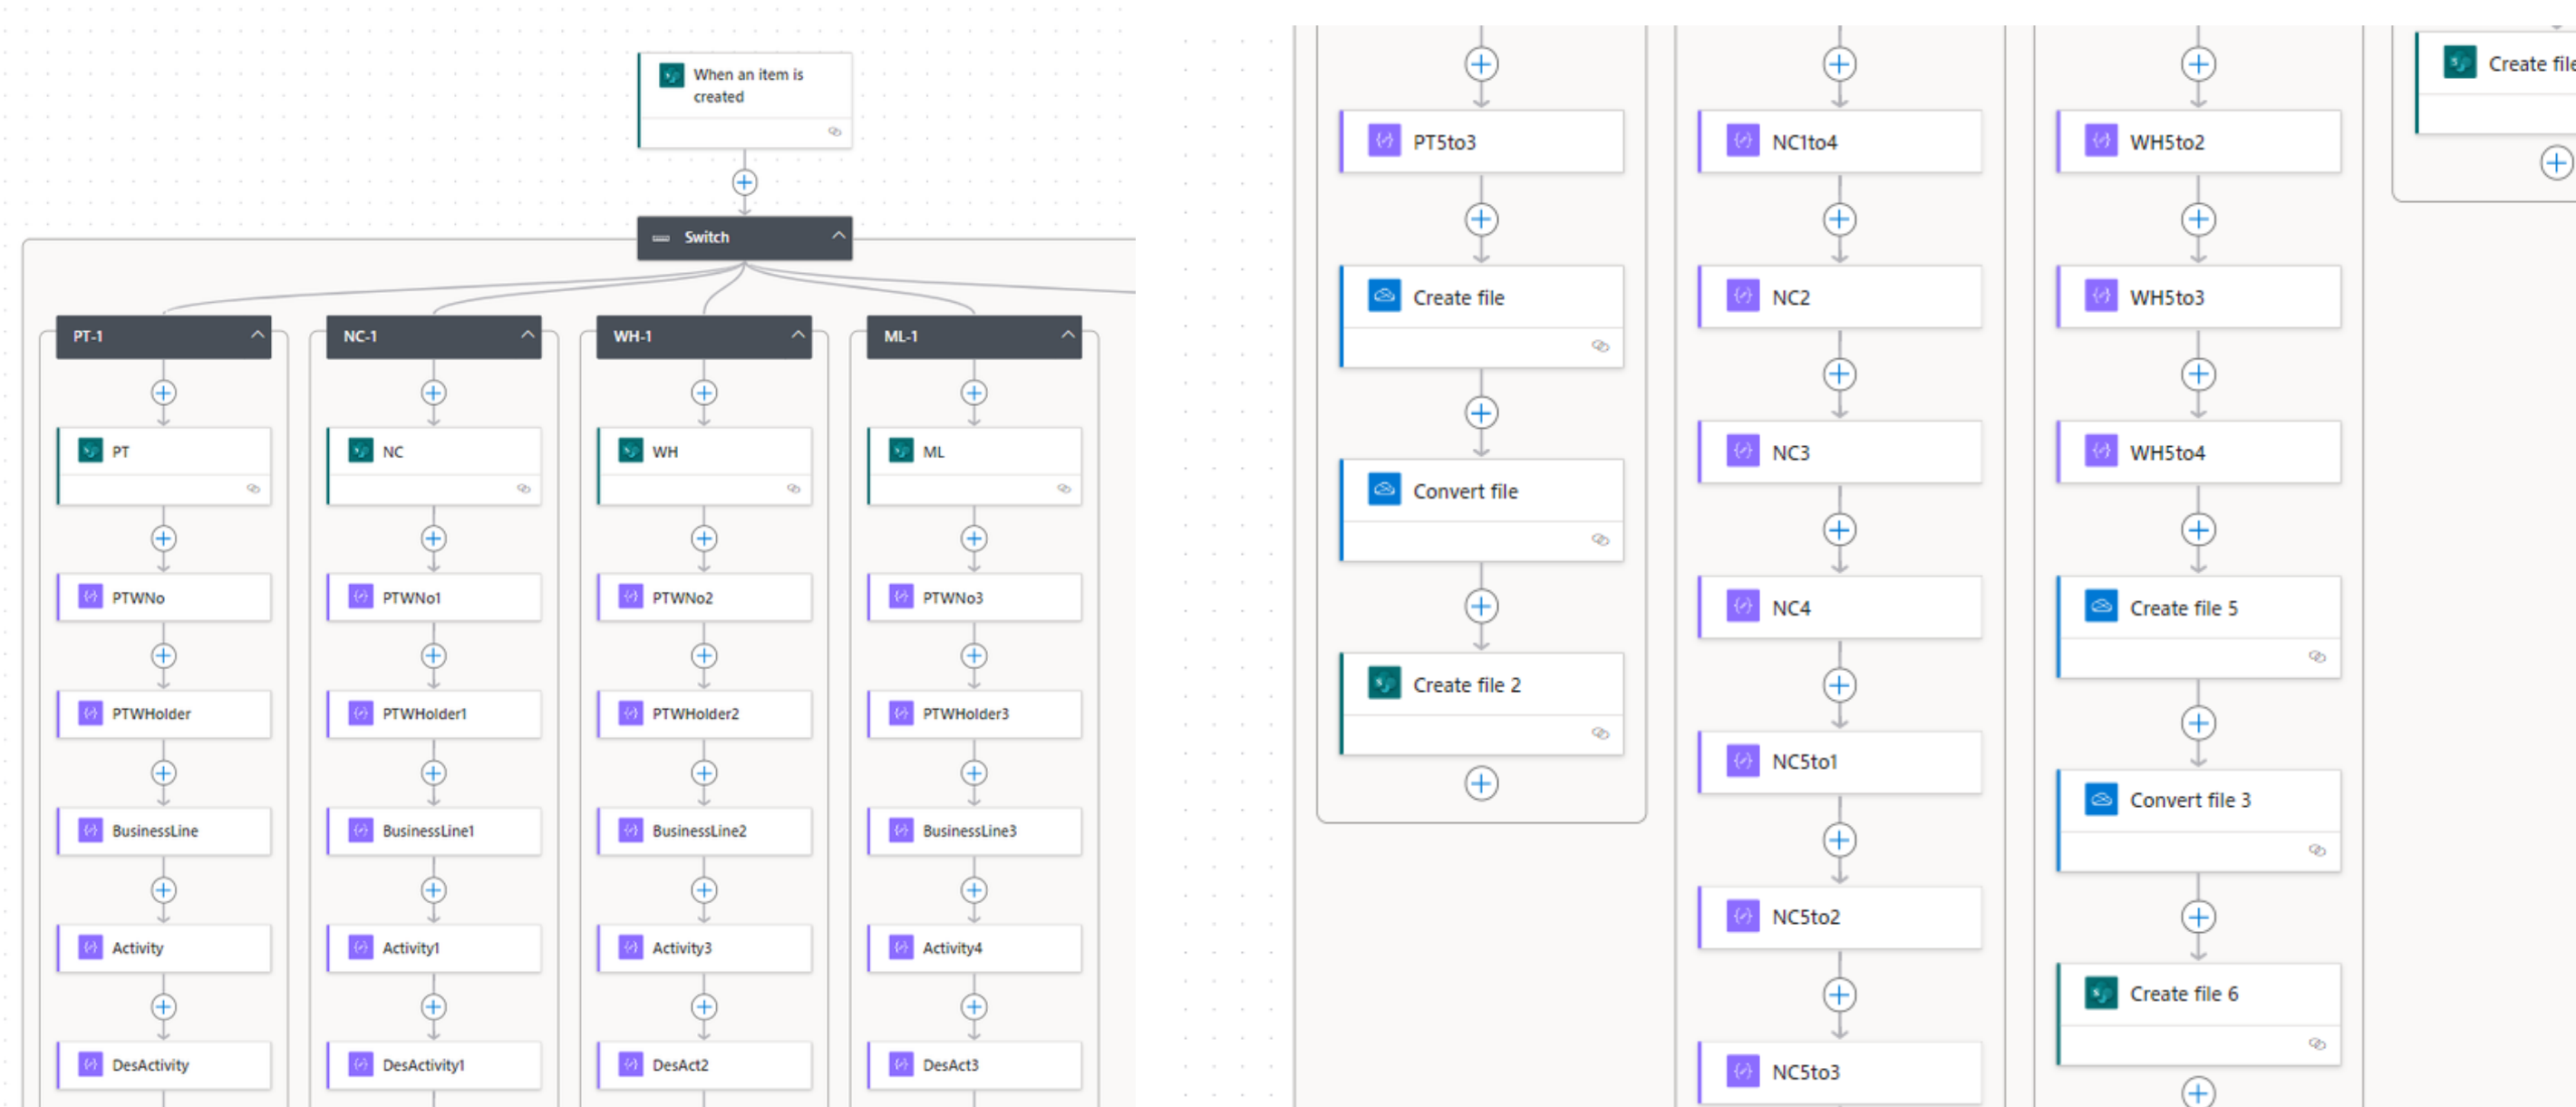

- Data from MS Forms is fetched and stored in SharePoint List
- Each record includes attachments, unique reference numbers, dates, and other metadata for traceability

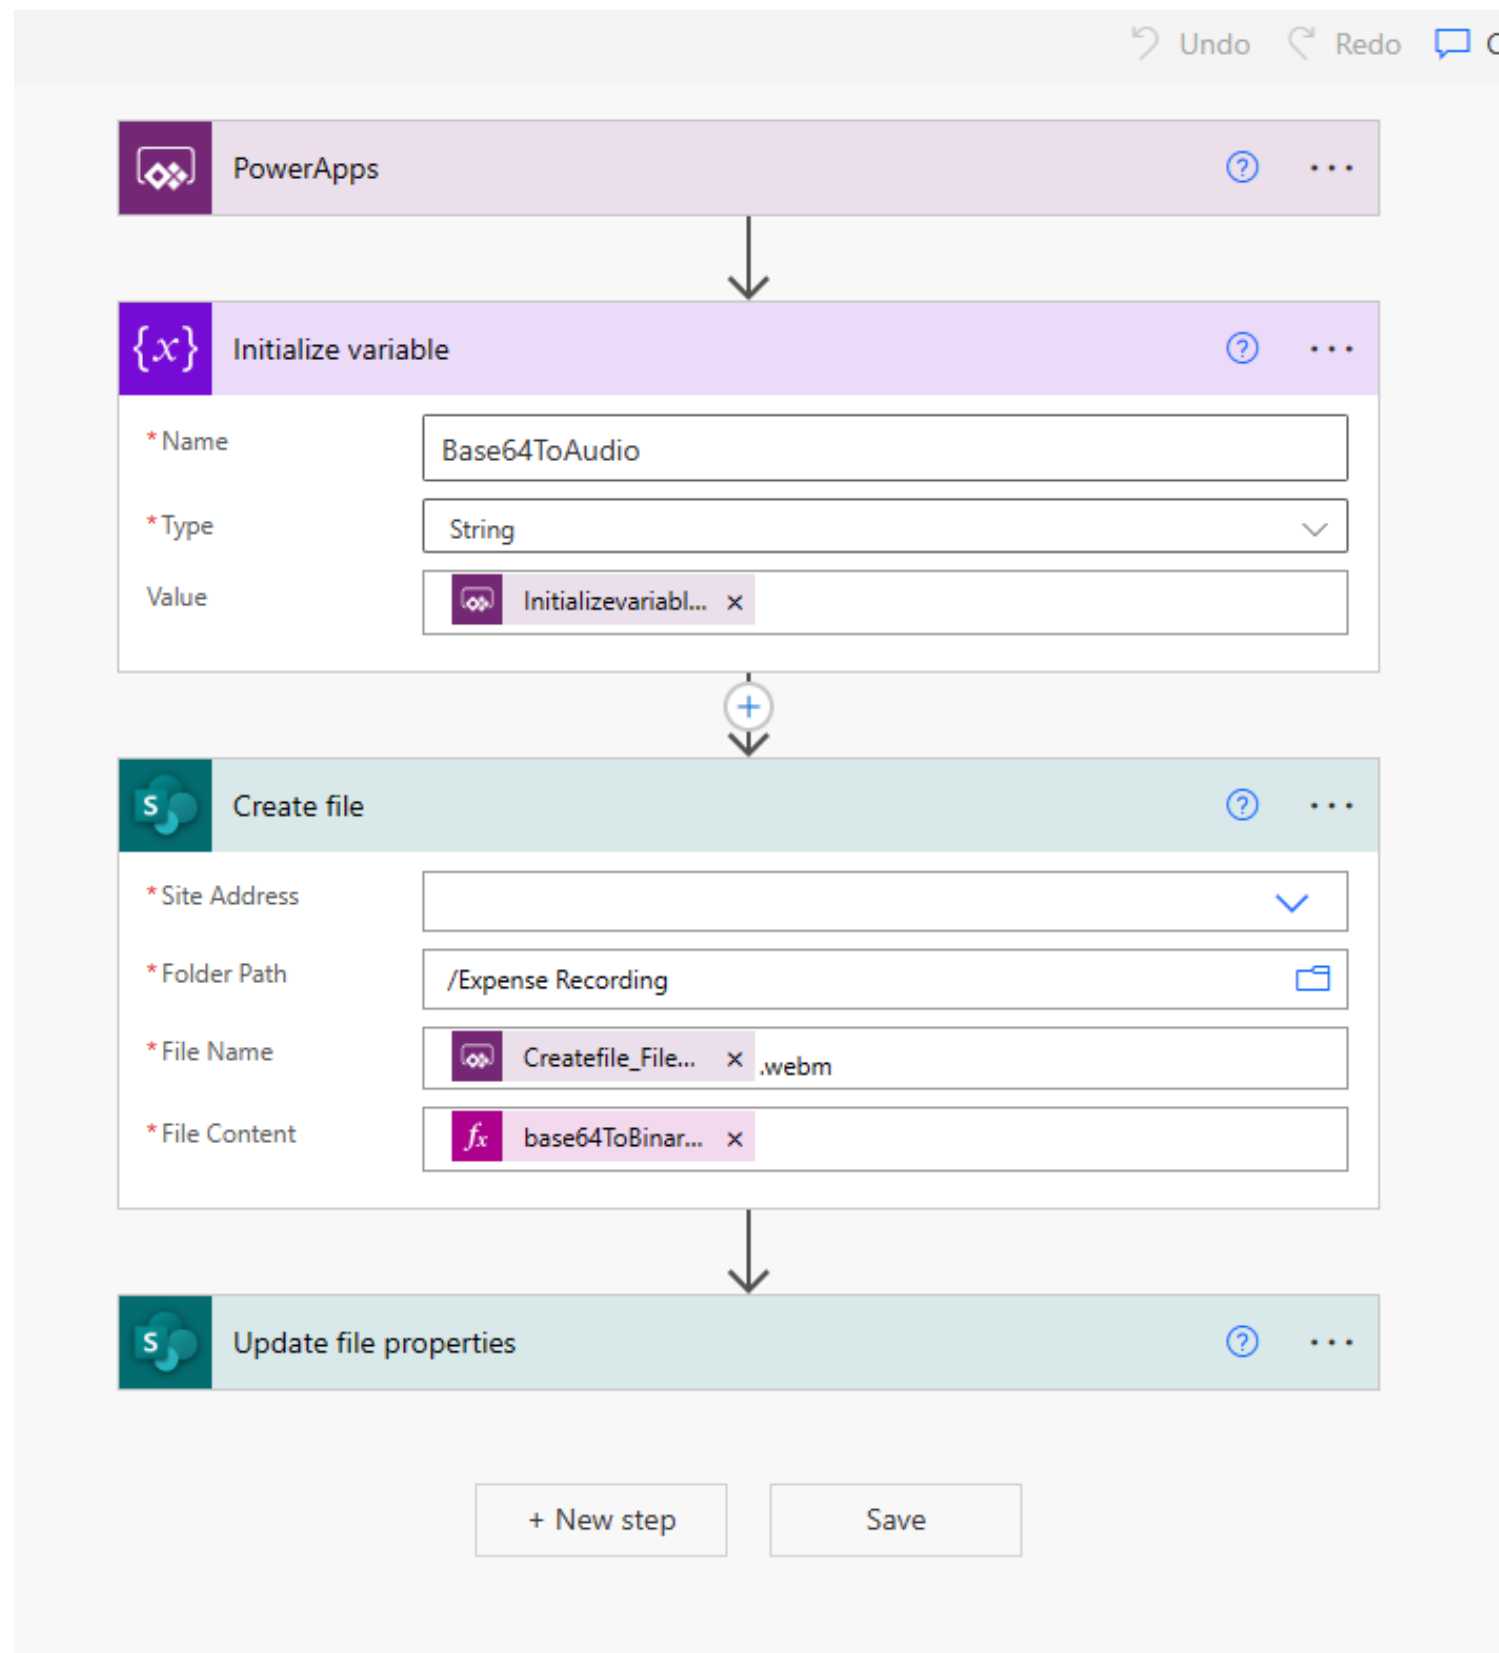

Project 5: PowerApps to PDF Generation

Developed a solution to convert PowerApps form data into downloadable PDF documents, fulfilling the client's documentation requirements.

Key Features:

- PowerApps form data captured and transformed into an HTML template
- HTML stored in OneDrive, then converted to Word and PDF using Power Automate
- PDF files saved in SharePoint Document Library for future reference

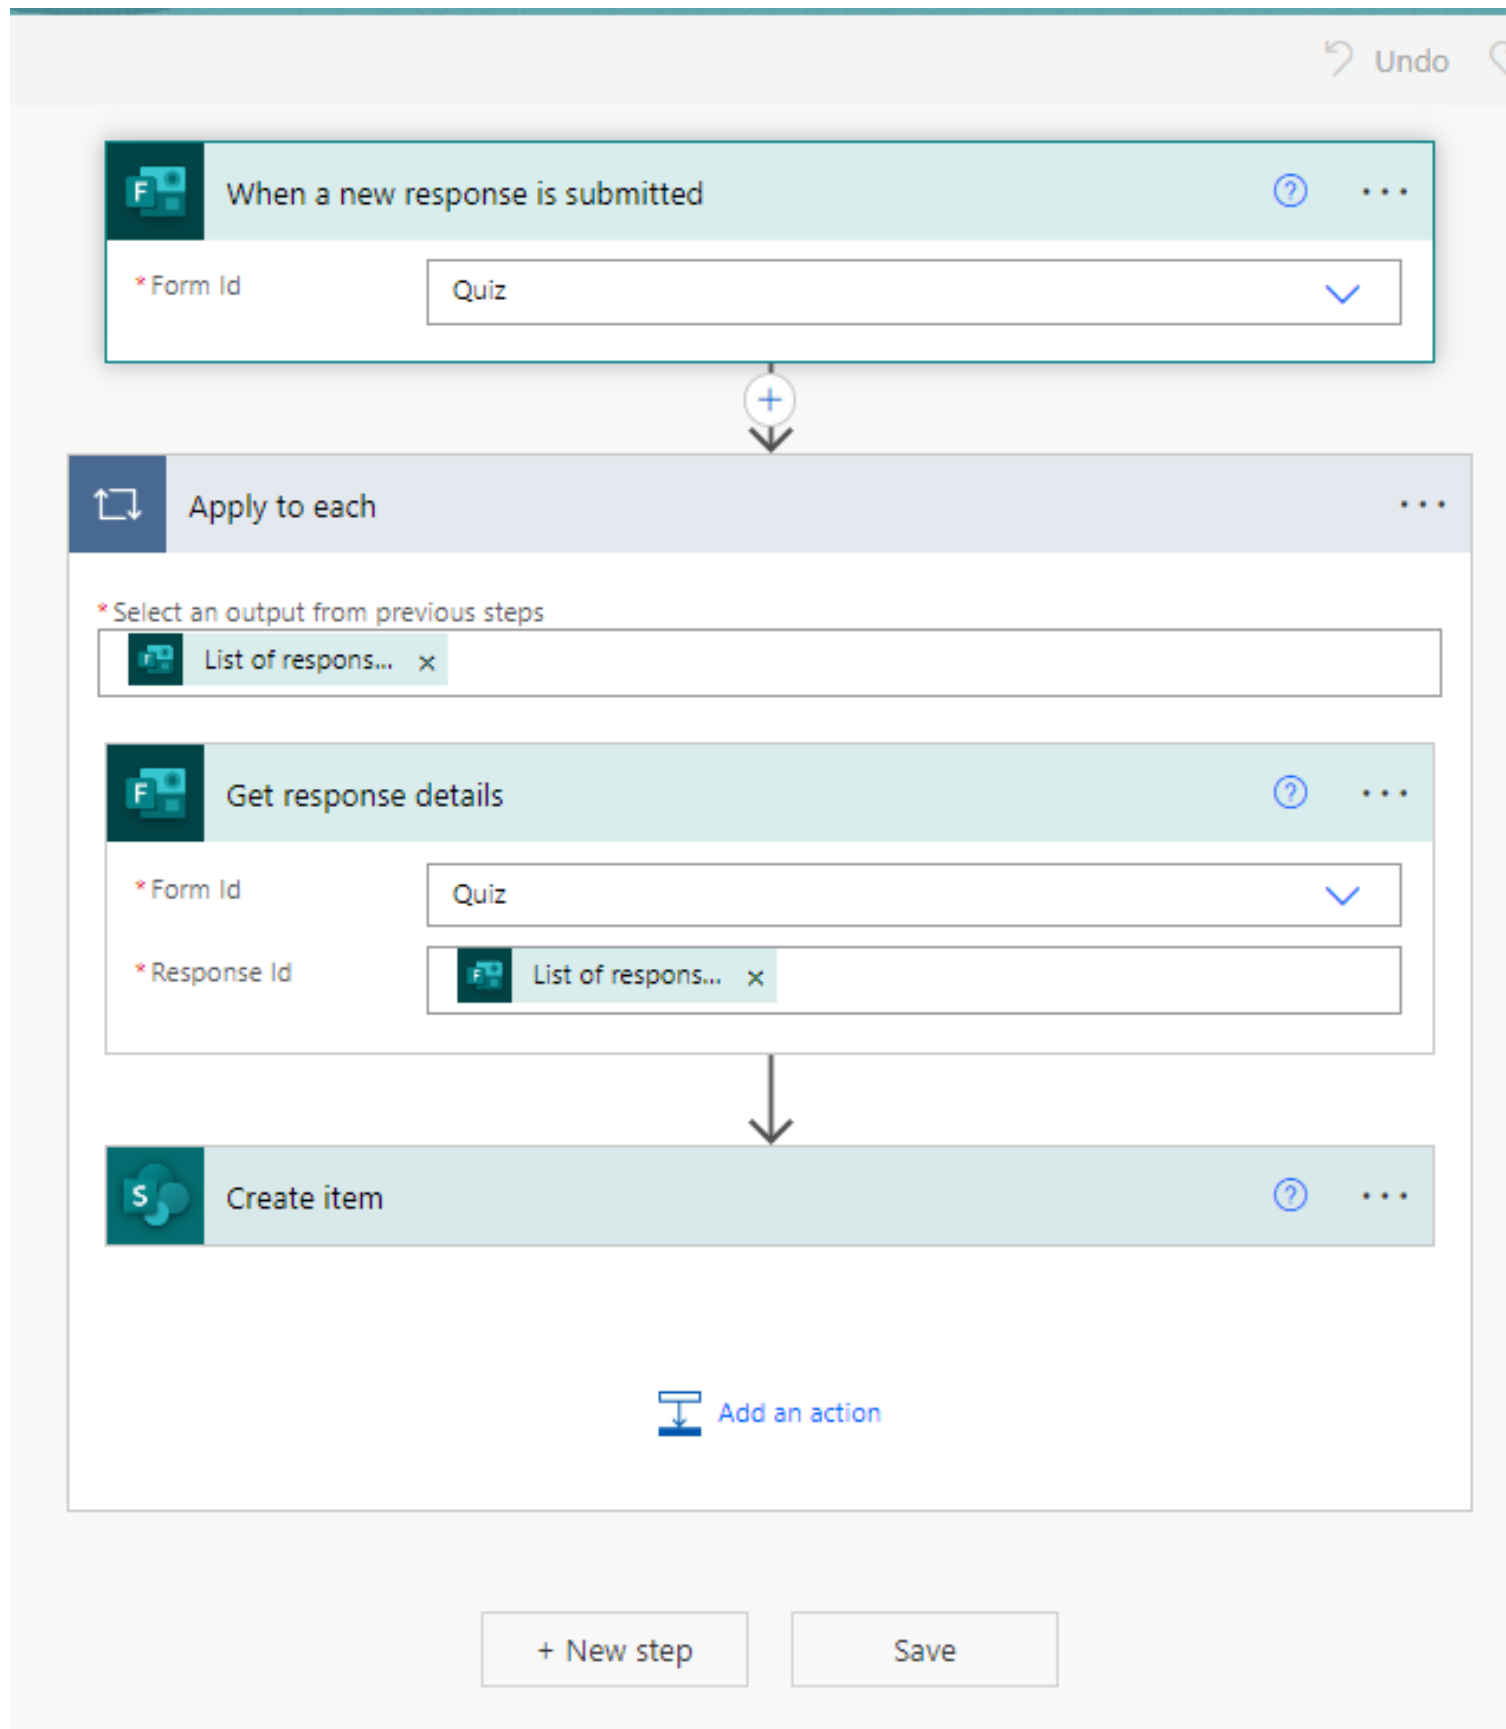

Project 6: Website Automation using RPA

Built an automated solution to capture live meeting recordings via PowerApps and store them systematically in SharePoint.

Key Features:

-  PowerApps used to initiate and record live meetings
-  Recordings saved in SharePoint Document Library through Power Automate
-  Audio converted to string, then into .webm format to address format compatibility challenges

The screenshot displays a Power Automate flow with the following steps:

- When a new response is submitted**: Trigger step with a dropdown menu set to "Quiz".
- Apply to each**: Loop step with a dropdown menu set to "List of respons...".
- Get response details**: Action step with a dropdown menu set to "Quiz" and a dropdown menu set to "List of respons...".
- Create item**: Action step.

At the bottom, there are buttons for "+ New step" and "Save".

Project 7: Quiz Forms to SharePoint

Developed a solution to capture quiz responses from Microsoft Forms and store them efficiently in SharePoint.

Key Features:

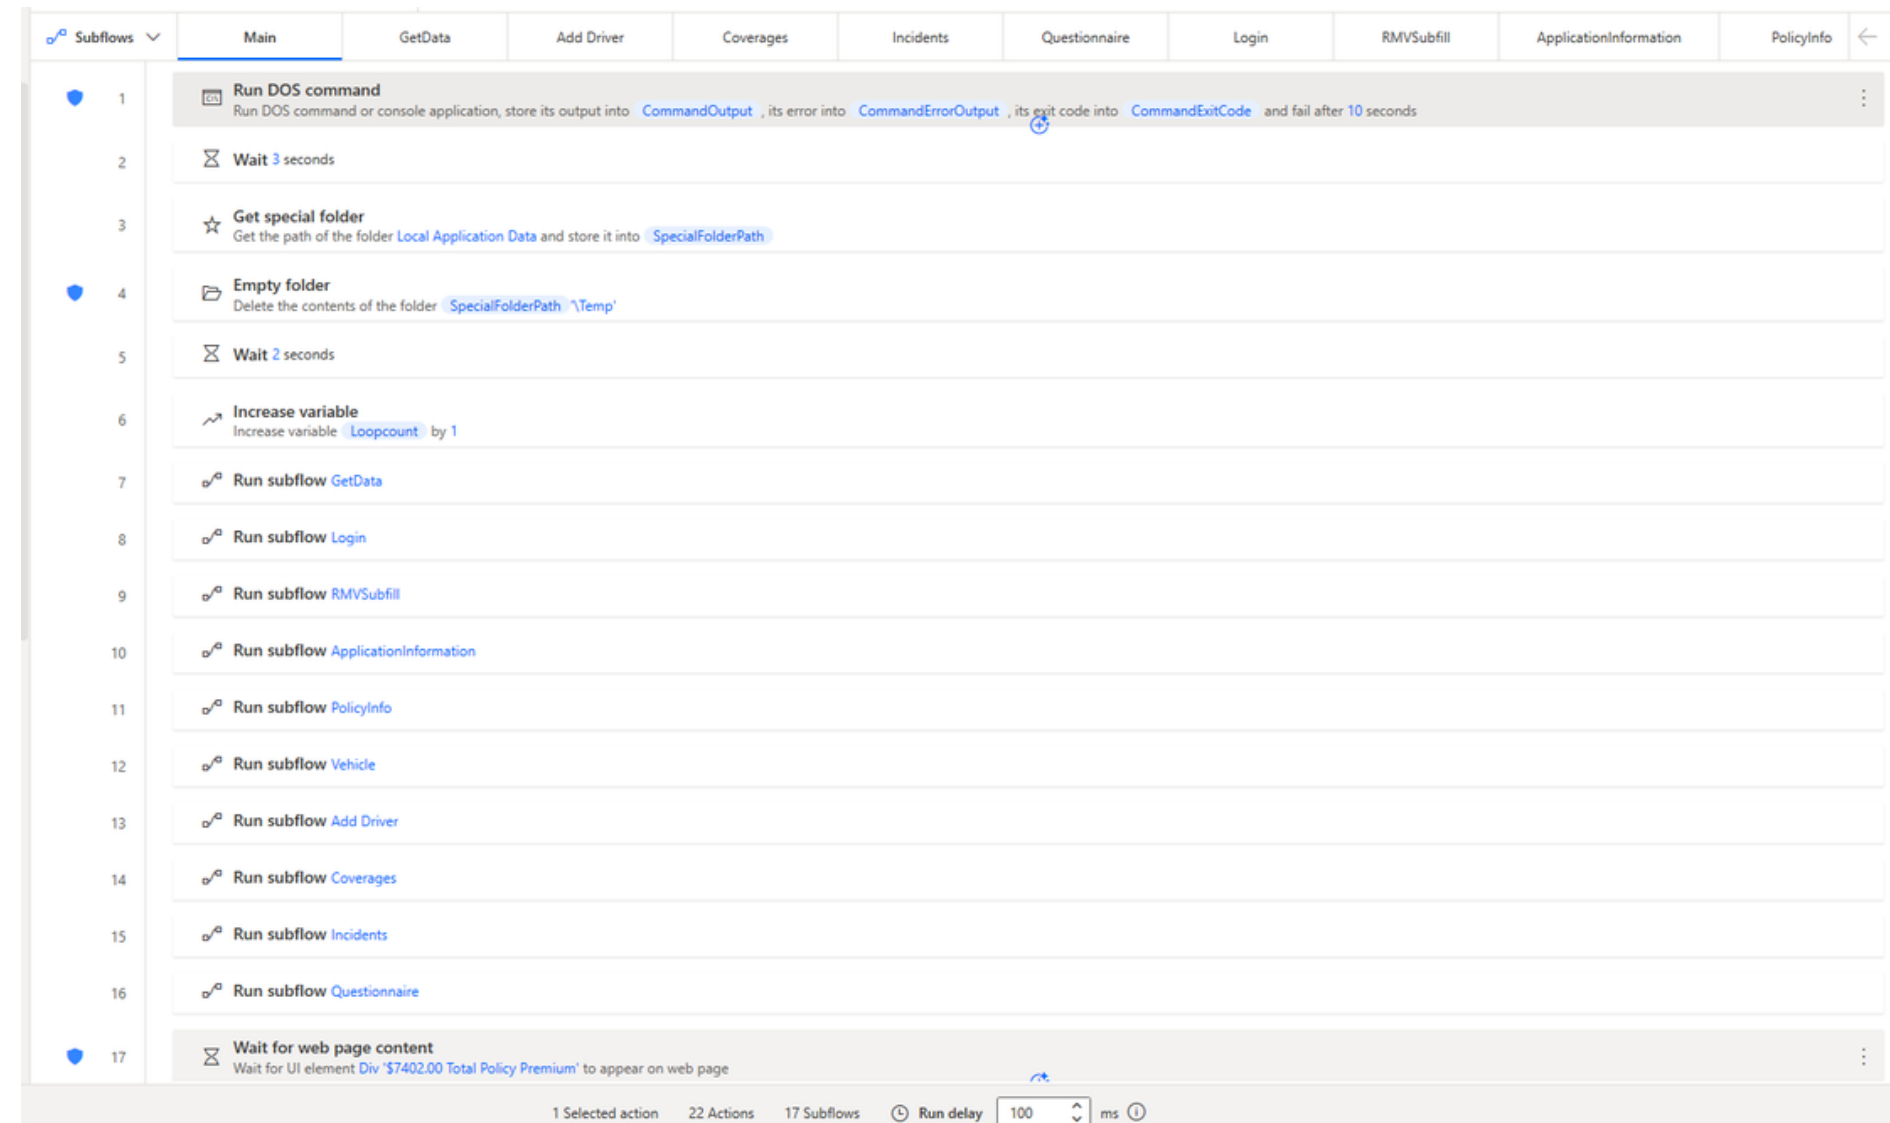

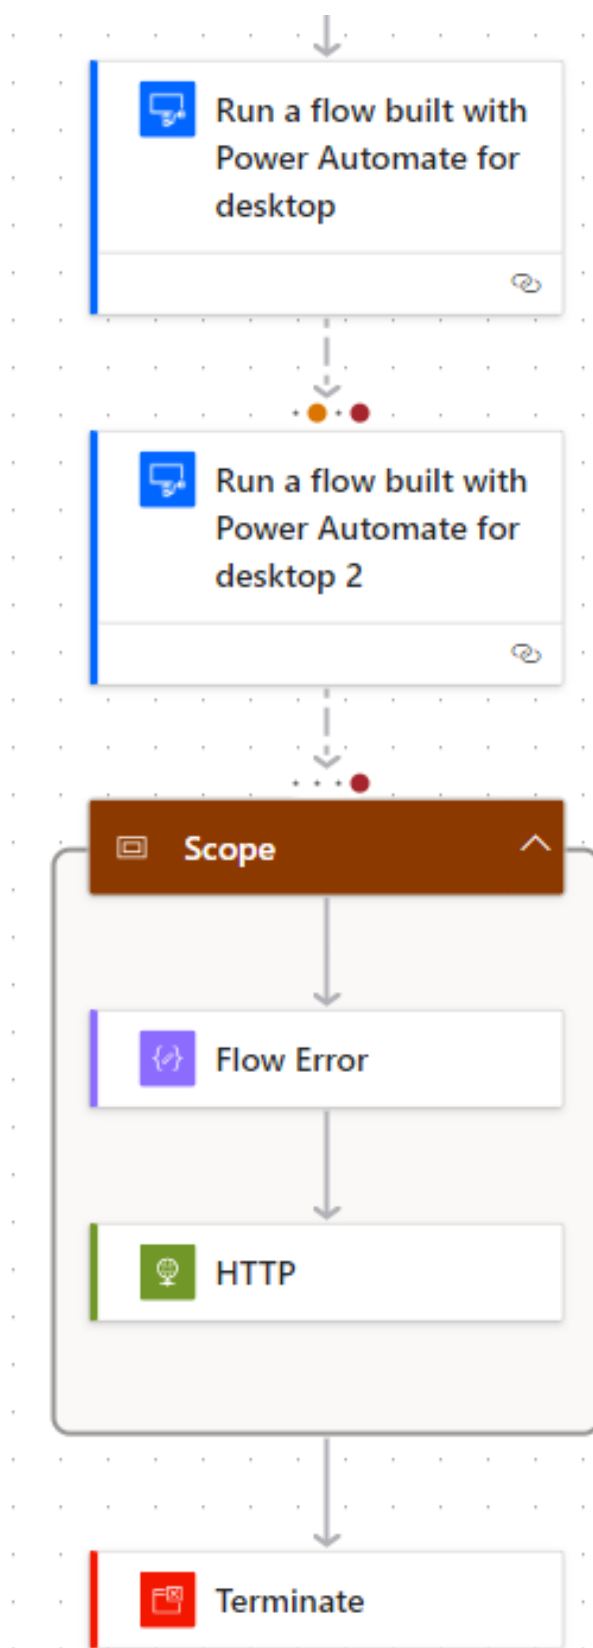

-  Automated fetching of quiz responses from MS Forms
-  Data stored in structured format within SharePoint List
-  Handled multiple question types and sections for accurate mapping

Project 8: Website Automation using RPA

Implemented an RPA solution to automate website interactions using Power Automate Desktop and Cloud flows.

Key Features:

-  Triggered desktop flows via HTTP actions using cloud flow APIs
-  Integrated with virtual machines (VMs) for executing automation tasks
-  API-driven automation triggered from external systems for seamless operations

Client Testimonials

- Real pleasure consulting with Ravi & Team Epicbliss to set up our company's entire SharePoint Intranet and portal. We will definitely be reaching out to team for future work to be done. - **Rachelle Glaccer (USA)**
- Overall Epicbliss delivered quality work. They have top-notch work ethics and a winning attitude. We recognize and appreciate your dedicated efforts. Thank you. - **Stephen Pean (Canada)**
- A+++. Very easy to work with and professional team Epicbliss - **Archie Patterson (Australia)**
- Ravi and team pack in terabytes of SharePoint and BI wisdom :-)
Are very clear in communication and can provide one-stop solution for everything SharePoint, database, data analytics or BI.
Look forward to working with them in future as well.
- **Marco (Germany)**
