Our Expertise

Services We Offer

- **Microsoft Technologies** – SharePoint, Power Automate, Microsoft Flow, Azure, Dynamics 365
- **BI & Analytics Tools** – Power BI, Tableau, Looker, QlikView, Pentaho
- **ETL & Data Integration** – Talend, Informatica, SQL, Pentaho Data Integration (PDI)
- **Salesforce Development** – Visualforce, Lightning Components (Aura Framework), Apex, Sales Cloud, Service Cloud
- **Mobile App Development** – iOS, Android, Flutter, Swift
- **Oracle Cloud Solutions** – Financials Cloud, Project Portfolio Management, EPM, HCM, CX Cloud, SCM Cloud
- **RPA Technologies** – PAD, Automation Anywhere, UiPath Development

At Epicbliss, our team of **25+ highly** skilled developers brings deep expertise across a wide range of modern technologies,

Our capabilities in powerApps

At Epicbliss, we harness the full potential of PowerApps to build custom business applications that streamline operations, enhance productivity, and solve real-world business challenges — all without heavy coding.

Our PowerApps Capabilities Include:

- ✓ **Canvas & Model-Driven Apps** – Expertise in building intuitive apps tailored to specific business processes using both app types
 -  **AI Integration** – Integrated AI Builder for object detection, form processing, and predictive modeling within apps
 -  **User-Centric Interfaces** – Designed engaging, responsive UIs with dynamic controls and conditional formatting for smooth user experience
 -  **Connector Expertise** – Leveraged 300+ connectors including SharePoint, SQL, Outlook, Dataverse, and custom APIs for seamless integration
 -  **Workflow Automation** – Automated approvals, notifications, and background tasks with Power Automate integration
 -  **Role-Based Access Control** – Applied role-specific access and security rules for secure app usage across departments
 -  **Cross-Platform Access** – Delivered apps accessible via web, tablets, and mobile devices for on-the-go operations
- Empower your teams with Epicbliss – where innovation meets low-code agility.

Diagnostic Feedback App – PowerApps for Continuous Product Improvement

The Diagnostic PowerApps Solution empowers organizations to collect, analyze, and act on real-time feedback to enhance product quality and user satisfaction. ✓ 📊 🔄

Through a structured questionnaire, businesses can gather insights on user experience, performance, and functionality — transforming feedback into actionable intelligence that fuels smarter development decisions. 💬 ⚙️ 📈

Key Features:

- Structured questionnaires to gather detailed feedback across product dimensions 📋 🗣️
- Real-time analytics on user responses for instant insight 🧠 📈
- Data-driven prioritization of product improvements and new feature ideas 💡 🚀
- Seamless user interface for high engagement and ease of use 💻 📱
- Supports continuous product refinement with user-centric insights 🔄 🎯

The screenshot displays the 'Strategic Focus Areas' section of the Diagnostic Feedback App. At the top, a progress bar shows the current step (1) and subsequent steps: Strategic Focus Area, Common Innovation Language, Pathway Architecture, Innovation Governance, Innovation Portfolio Management, Innovation Behaviors, Talent Enablers, and Results. The main content area is divided into two sections. The first section, '1. Does the organization have a clear strategy that is grounded in a POV of the future environment and what it will take to win?', contains three options: 'Focus areas are not explicitly linked to strategy or an understanding of the future environment', 'Some innovation focus areas are linked to strategy and a POV of the future environment, but some focus areas are independent of strategy', and 'All focus areas are aligned to corporate strategy and an understanding of the future environment'. The third option is selected, indicated by a green background. The second section, '2. Have we defined and aligned our organization on the business and growth outcomes we need innovation to achieve?', contains three options: 'No business outcomes defined; innovation is rarely discussed, if at all', 'Growth goals are loosely defined but they lack specificity in terms of timeline, type, and/or role of innovation', and 'Growth goals are clearly defined and the role of innovation is deeply incorporated into future plans and have been granularized by innovation type'. The third option is selected, indicated by a blue background. On the left side, there is a 'Priorities' section with a 'Strategic Focus Areas' tab. Below this, there are two questions with three options each. Question 1 has options 'Option 1', 'Option 2', and 'Option 3'. Question 2 has options 'Option 1', 'Option 2', and 'Option 3'. The 'Option 2' button for Question 1 is highlighted with a green border and a 'Hover color' label. At the bottom, there are navigation buttons: 'Go to the previous tab' (left arrow) and 'Go to the Next tab' (right arrow).

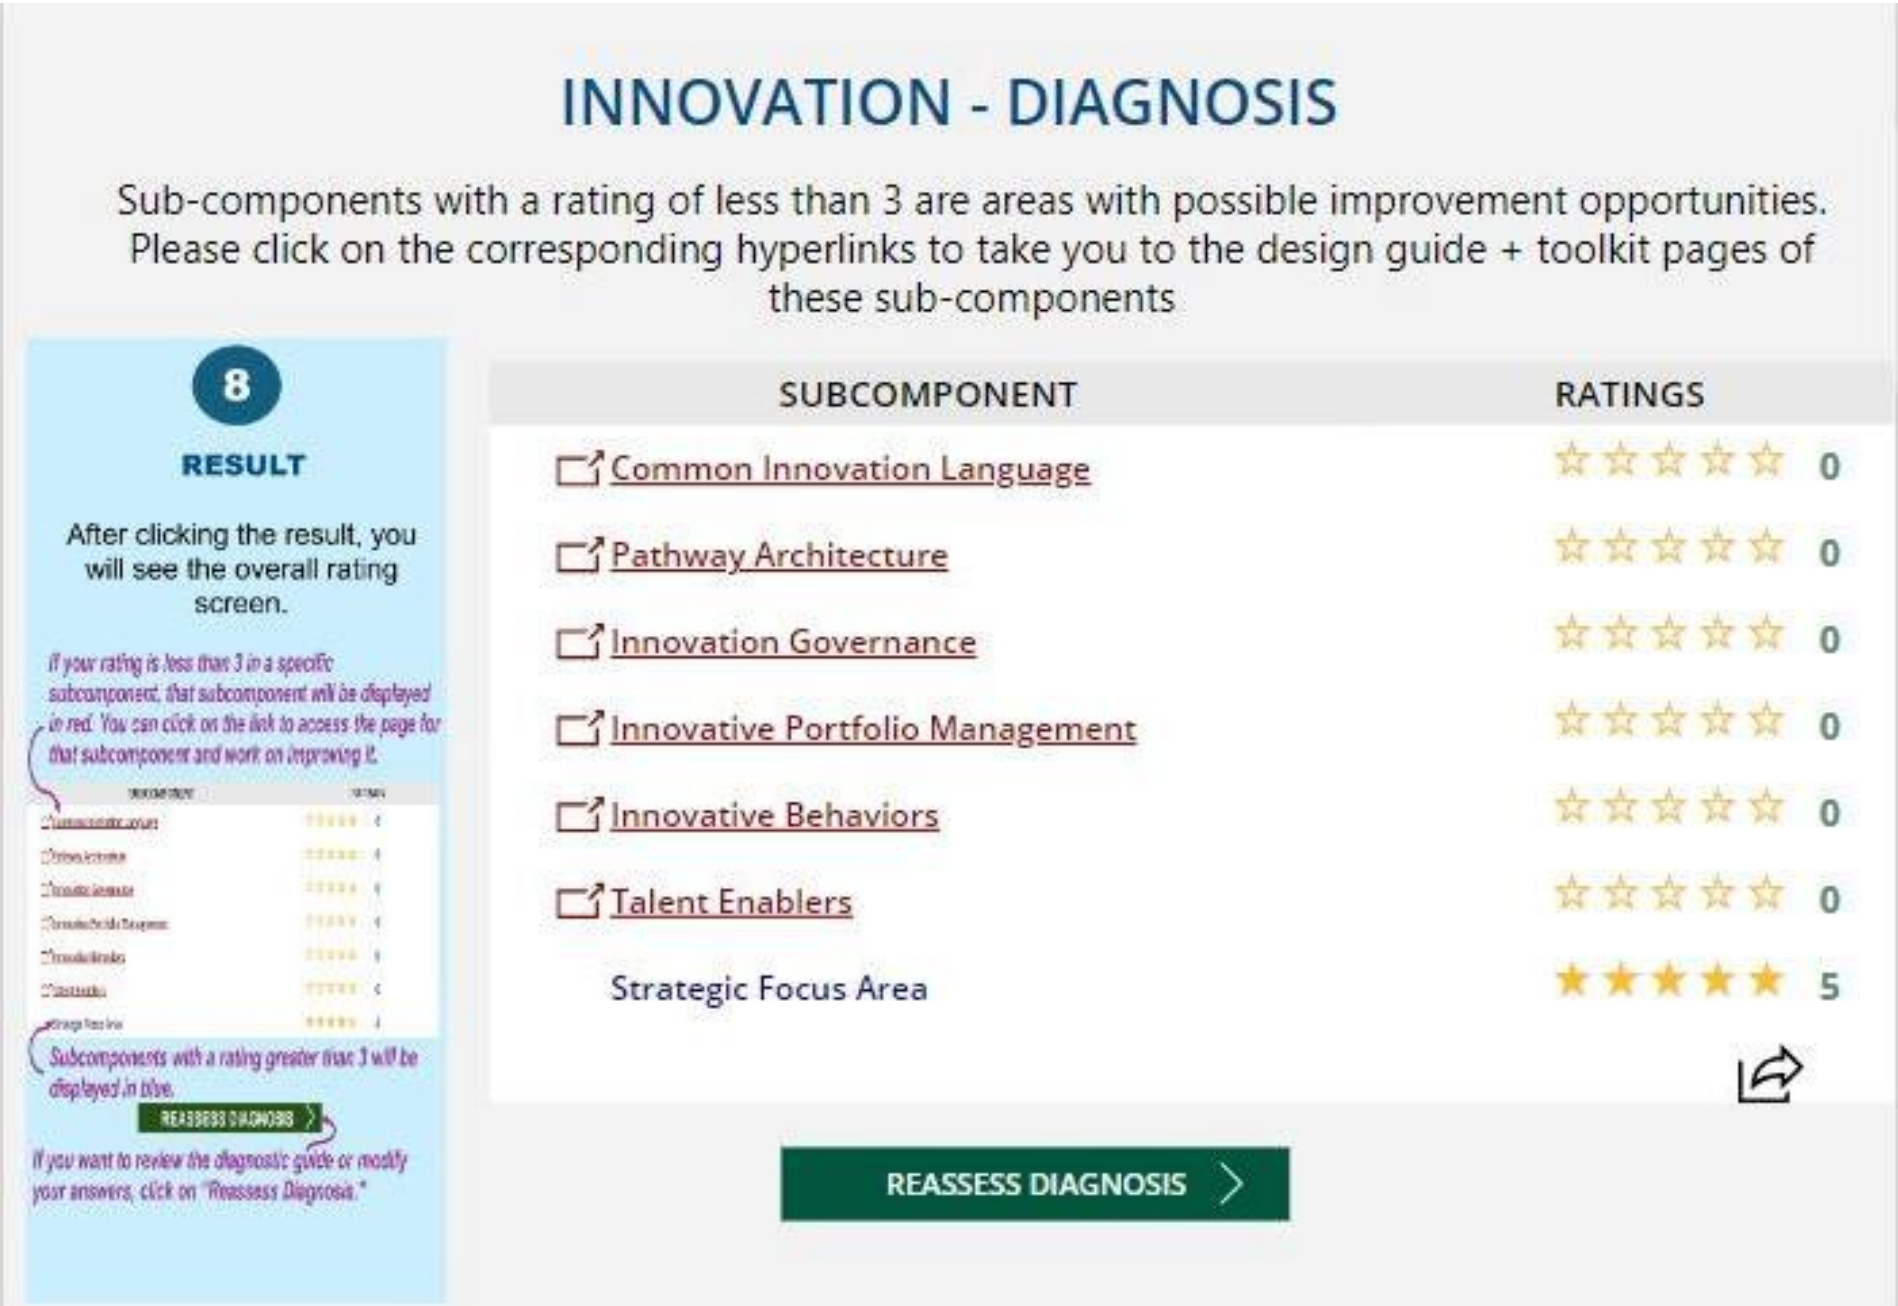

Diagnostic Feedback App – PowerApps for Product Enhancement

This Diagnostic PowerApp enables organizations to streamline the feedback collection process through structured questionnaires, empowering continuous product improvement. 📄 🔍 ✨

Users can provide input on functionality, user experience, and overall performance — helping businesses gain real-time, actionable insights to make informed decisions. 🚀 📊 💡

Key Features:

- 📄 Collect Feedback: Design structured questionnaires to gather input on product usability, functionality, and performance.
- 📊 Analyze Data: Real-time data analysis highlights strengths and pinpoints areas for improvement.
- 🧠 Make Informed Decisions: Prioritize product updates, feature additions, and bug fixes based on real user needs.
- 🔄 Streamlined Process: Automates the cycle of feedback to improvement, reducing development cycles.
- 🎯 User-Centric Development: Drives innovation through actual customer insights, ensuring the product evolves with its audience.

🔧 Tool & Store Management App – PowerApps + SharePoint Integration

This PowerApps solution was built to streamline the process of recording and managing tool and store information for a client in the electrical domain. The app is fully integrated with SharePoint, ensuring that all submitted data is securely stored and easily accessible. 🛠️ 📋 🔗

Designed for web and tablet interfaces, the app features an intuitive multi-screen flow for data input, review, and editing.

Screen 3

Screen 4

🔑 Key Screens & Features:

- 🟢 Login Screen (Screen 1): Allows users to securely log in by entering their email address.
- 📝 Data Entry Form (Screen 2): Users fill out all required fields related to tools and store details.
- 👁️ Form Review (Screen 3): Displays the submitted data for confirmation and clarity.
- 🛠️ Data Management Screen (Screen 4): Enables users to view all entries, edit records, and navigate back to the home screen.

🎯 Highlights:

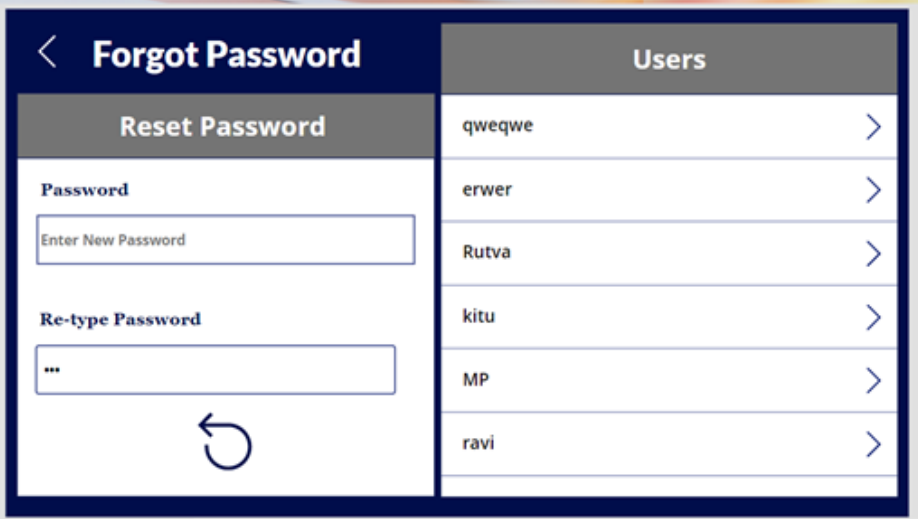

- Built for the electrical industry
- Fully responsive on web and tablet devices

Digital Banking App – PowerApps Financial Services Solution

This application is specially designed to provide users with secure access to their bank accounts and perform financial transactions via the internet on their smartphone, tablet, or computer. 

It delivers a seamless digital banking experience — fast, user-friendly, and accessible from anywhere — without needing to visit or call the bank.

Key Features & User Flow:

-  User Registration: New users can register via the “Add New User” screen to create an account.
-  Secure Login: Existing users can securely log in to the banking portal.
-  Password Recovery: Forgot your password? Use the “Forgot Password” screen to reset it with ease.
-  Banking Functions: Create accounts, apply for loans, request debit/credit cards, and transfer money — all from within the app.

Benefits:

- 24/7 Access to banking services
- No physical branch visits required
- Easy, fast, and secure digital experience

This app redefines convenience in personal banking, combining the power of PowerApps with the critical functions of modern financial services.

PowerApps Projects Delivered

Digital Banking App – Online Services Overview

Once users log in to the banking portal, they are greeted with a Home Page showcasing key details such as available banking services, interest rates, and charges. 🏠 📈 💼

🌟 Main Functionalities:

- 📄 **Open a Bank Account:** Users can easily open a new account online by filling in a simple application form directly within the app.
- 🏠 **Apply for a Card :** With just a click on the “Get Card Online” button, users can fill in the required details and request a credit or debit card online.
- 💬 **Submit Feedback:** The app features a dedicated Feedback Screen where users can share their experiences or suggestions to help improve services.

This digital experience streamlines essential banking processes, enabling customers to handle tasks efficiently without visiting a physical branch — all through an intuitive PowerApps interface.

📱 Mobile Leave Application – PowerApps + SharePoint Integration

This solution was developed using PowerApps and SharePoint, where multiple applications and customized forms were created for SharePoint Lists. The app is tailored specifically for mobile users in the IT industry. 📁 📱

🌟 Key Features:

- 📄 **User Registration:** New users can register themselves directly within the app.
- 📅 **Leave Application:** Registered users can apply for leave via a user-friendly form.
- 📄 **Custom Forms:** The leave form includes validations and mandatory fields to ensure accurate data entry.
- 📁 **SharePoint Integration:** All submitted leave requests are stored in a SharePoint list for centralized access and tracking.
- 📱 **Mobile-Optimized UI:** Designed specifically for mobile screens, ensuring a seamless experience for on-the-go users.

This app streamlines employee leave requests while maintaining data integrity and centralized records. ✅ 📄

It is Certified that Miss Maitri Patel was employee of Epicbliss Solution as a It Developer from 2/1/2021 to 2/21/2022

During her employment with Mimi Memorial School, she has graced our school with her excellent teaching skills. Students have been responding well to her warm nature and engaging teaching methods.

Her roles and responsibilities include planning and preparing lessons based on national curriculum guidelines, following the designated curriculum completely on time, implementing proper classroom management practices, encouraging students to focus on their studies and to participate in extracurricular activities, assessing and dealing with (when necessary) students' behaviors, participating in staff as well as parents-teachers meetings, and utilizing to-date teaching methods, among many others.

We have enjoyed watching her grow and upskill herself during her time here with us, and we wish her the best of luck in her future endeavours.

Thank you for your 1 Year service

Name: Maitri Patel
Date: 1/4/2021

For Epicbliss Solution,
Ravi Jogi
CEO

Employee Letter Generator – PowerApps + SharePoint Integration

This PowerApps application is designed to streamline the generation of Appointment and Experience Letters for employees within an organization. 🧑💼

🌟 Key Features:

- **Employee Details Form** : The first screen allows users to enter employee information using a structured form.
- **Data Submission** : Upon clicking the Submit button, the entered details are stored securely in a SharePoint list.
- **Letter Type Selection** : A filter labeled "Letter Type" enables users to select between an Experience or Appointment letter.
- **Dynamic Letter Generation** : Based on the selected type, the second screen displays a pre-formatted letter dynamically filled with the employee's data.
- **Easy Navigation** : Users can switch between tabs for data entry and letter preview seamlessly.

Shopping Cart Management App – PowerApps + SharePoint

This application is designed for the eCommerce domain, allowing users to manage and view shopping cart data efficiently. It is built with a focus on larger screens like iPads and tablets for better usability in commercial settings.

◆ Key Features:

-  **Search & Name Filters:** Quickly locate specific items using search fields and filters.
-  **Department View:** Easily browse products by department.
-  **Add to Cart Functionality:** Users can add items to their cart directly within the app.
-  **Custom Filters:** Apply multiple filters to narrow down results.
-  **Full CRUD Operations:** Data can be added, updated, or deleted, all integrated with SharePoint.

 All data is stored in a SharePoint list, making it easy to manage backend operations while providing a smooth front-end experience for users.

Invoice Workflow & Management App – PowerApps + Power Automate

This application is designed specifically for the Finance domain, enabling users to generate, track, and manage invoices seamlessly. Built for iPads and tablet screens, it ensures smooth navigation and an optimal user experience.

◆ Key Features:

-  **Invoice Workflow** Tracking: View each invoice's current status and the stage it has reached in the approval pipeline.
-  **Document Upload:** Attach and upload invoices directly within the app.
-  **Invoice Cancellation:** Option to cancel invoices with reason tracking.
-  **Reminder System:** Integrated with Power Automate to send timely reminders to stakeholders.
-  **Smart Notifications:** Keep users updated throughout the invoice approval process.

Panel Management Dashboard – PowerApps + SharePoint

This application is developed to view and manage panel-related data efficiently using a modern, web-based interface. Built specifically for larger screens such as desktops and tablets, it provides a user-friendly layout for smooth operations.

◆ Key Features:

-  **Panel Data Control:** View, add, edit, delete, and refresh panel records stored in SharePoint.
-  **Menu Navigation:** A left-side navigation panel provides access to multiple screens, each designed for a specific functionality.
-  **Real-Time Updates:** Data changes are instantly reflected with SharePoint integration, ensuring accuracy.
-  **Domain:** Please confirm the specific domain (e.g., Manufacturing, Electrical, Engineering) so it can be added appropriately.

Shop Inventory Tracker – PowerApps + SharePoint

This PowerApps solution is built to efficiently track and manage shop inventory data, designed for web-based access on larger screens like desktops and tablets. It enhances product monitoring through a structured and interactive interface.

◆ Key Features:

-  **Inventory Management:** View, add, update, or delete product data directly from the SharePoint-integrated app.
-  **Unique Identifiers:** Each product entry is tagged with a unique reference ID for easy identification.
-  **Image Uploads:** Users can attach product images for better visibility and clarity.
-  **Product Insights:** Check category, status, comments, and more for each listed item.

Form Submission App – PowerApps + SharePoint Integration

This project was developed to fulfill the client’s requirement of capturing detailed form entries via PowerApps and storing them securely in SharePoint. The app provides a seamless multi-screen experience optimized for structured data collection.

◆ App Flow & Features:

-  **Screen 1 – Category Selection:** Users begin by selecting the relevant category to tailor the form experience.
-  **Screen 2 – Data Entry Form:** All required fields are displayed for the user to fill in details based on the selected category.
-  **Screen 3 – Form Summary:** Once submitted, the app displays a summary view of entered data for confirmation or review.

PDF Form Digitization – PowerApps + SharePoint Integration

The objective of this project was to digitize an existing PDF form by creating a custom, interactive form in PowerApps. All form data is seamlessly stored in a SharePoint list for easy management and retrieval.

◆ App Features & Flow:

-  **Screen 1** – Custom Form Interface: Users are presented with an intuitive form that includes text fields, dropdown menus, and People Picker columns to replicate the structure of the original PDF.
-  All submitted data is securely stored in SharePoint, enabling centralized access and efficient tracking.

Travel Schedule Application – PowerApps + SharePoint

This application is designed for employees who travel for work or business purposes, allowing them to efficiently plan and manage their travel schedules.

- ◆ **Key Features & Flow:**
 -  **Screen 1 – Trip Registration:** Employees enter their trip details through a user-friendly form. Mandatory fields and validations ensure accurate data entry. Once submitted, the data is securely saved in a SharePoint List.
 -  **Screen 2 – Trip Overview:** Users can view all planned trips and, if needed, delete existing trip entries using the navigation and delete icon available from Screen 1.

Quality Monitoring & Reporting Solution – PowerApps + Power BI + SharePoint

This solution focuses on enhancing quality tracking, operator performance visibility, and form usability for a manufacturing/audit environment.

Project Requirements:

1. Power BI Report – Operator & Part Failure Analysis:

- Create a detailed Power BI dashboard to identify which operators are failing the most parts, along with:
 -  The specific parts failed
 -  Associated auditors
 -  Overall failure trends and frequency

2. PowerApps Form Enhancements:

- Modify the form to allow saving data without requiring KO# (Knock-Out number).
- Ensure that Operator Name and KO# can only be selected from a SharePoint list, enabling data consistency while still being optional.

3. Attachment Flexibility:

- Allow manual picture uploads (from device storage) when a camera is not available on the device (e.g., on laptops).
- Ensure image attachments are still linked and saved properly to the associated SharePoint item.

Laser Instruction Alert App (PowerApps + SharePoint)

A standalone PowerApp that scans a barcode from the ticket. If the scanned part requires lasering, the app will flash “LASER” in red and white to alert the operator. It also opens a PDF file (stored in SharePoint) with laser instructions for the part.

Key Features:

- Barcode scanning using PowerApps
- Conditional “LASER” alert with flashing animation
- Auto-load PDF from SharePoint for instructions
- Fully integrated with SharePoint List & Document Library

Intelligent Barcode scanner
