- **ETL & Data Integration** – Talend, Informatica, SQL, Pentaho Data Integration (PDI)
- **Salesforce Development** – Visualforce, Lightning Components (Aura Framework), Apex, Sales Cloud, Service Cloud
- **Mobile App Development** – iOS, Android, Flutter, Swift
- **Oracle Cloud Solutions** – Financials Cloud, Project Portfolio Management, EPM, HCM, CX Cloud, SCM Cloud
- **RPA Technologies** – PAD, Automation Anywhere, UiPath Development

At Epicbliss, our team of **25+ highly** skilled developers brings deep expertise across a wide range of modern technologies,

SharePoint Projects Delivered

Intranet Solutions Tailored for Engagement and Productivity

At Epicbliss, we've successfully delivered 30+ custom Intranet projects, designed to enhance internal communication, collaboration, and user experience.

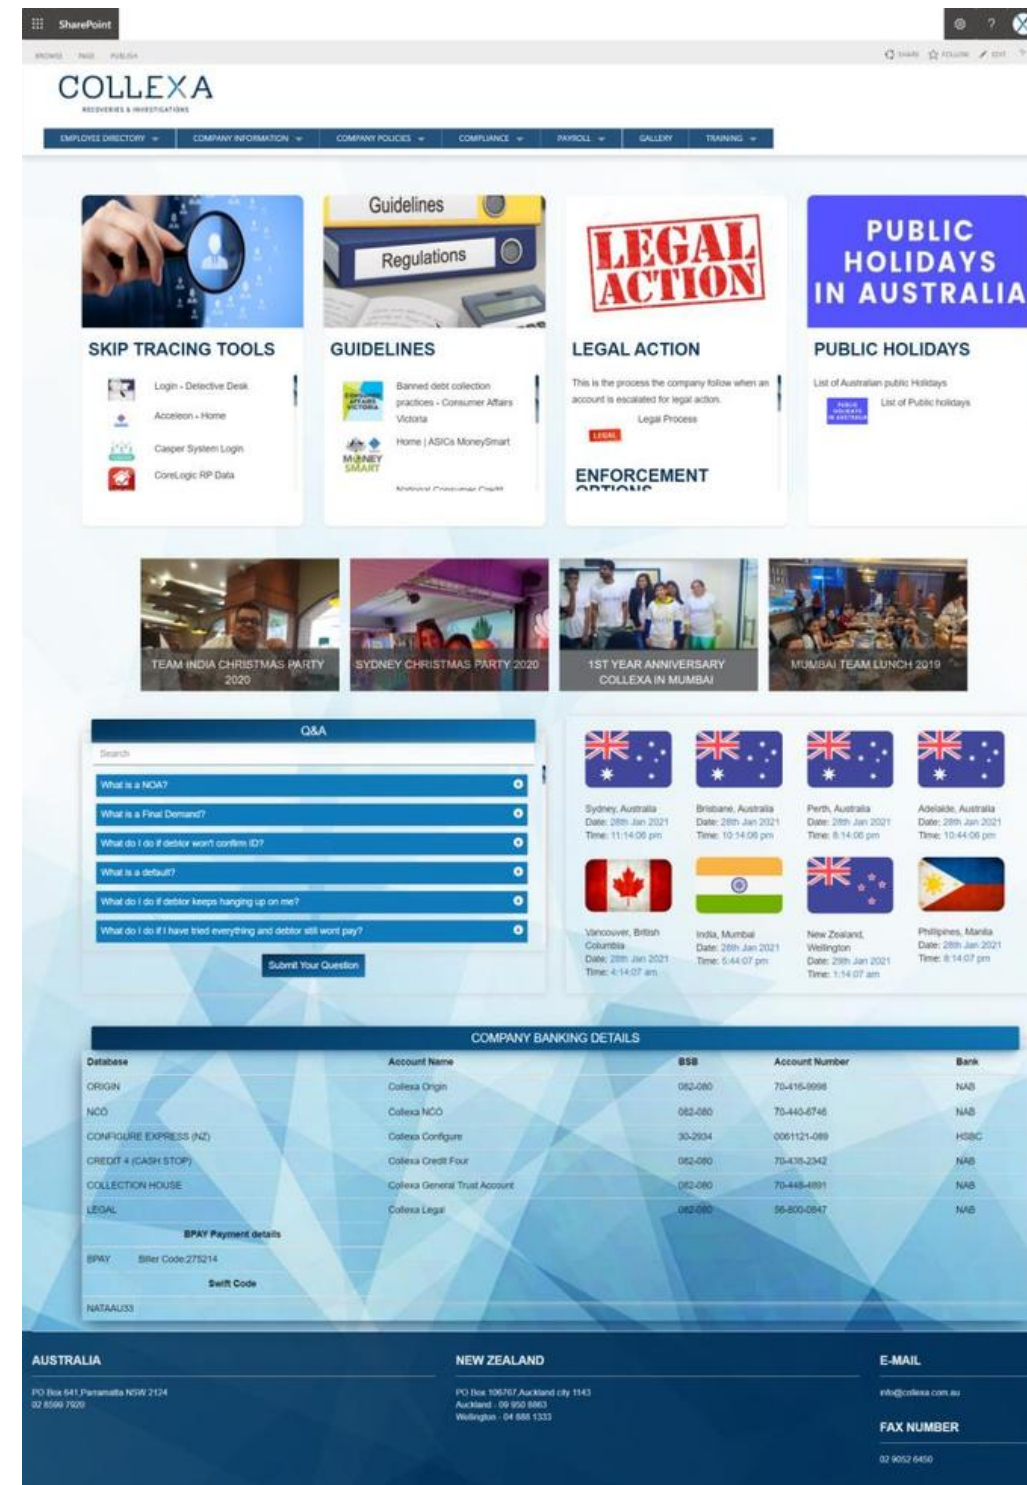

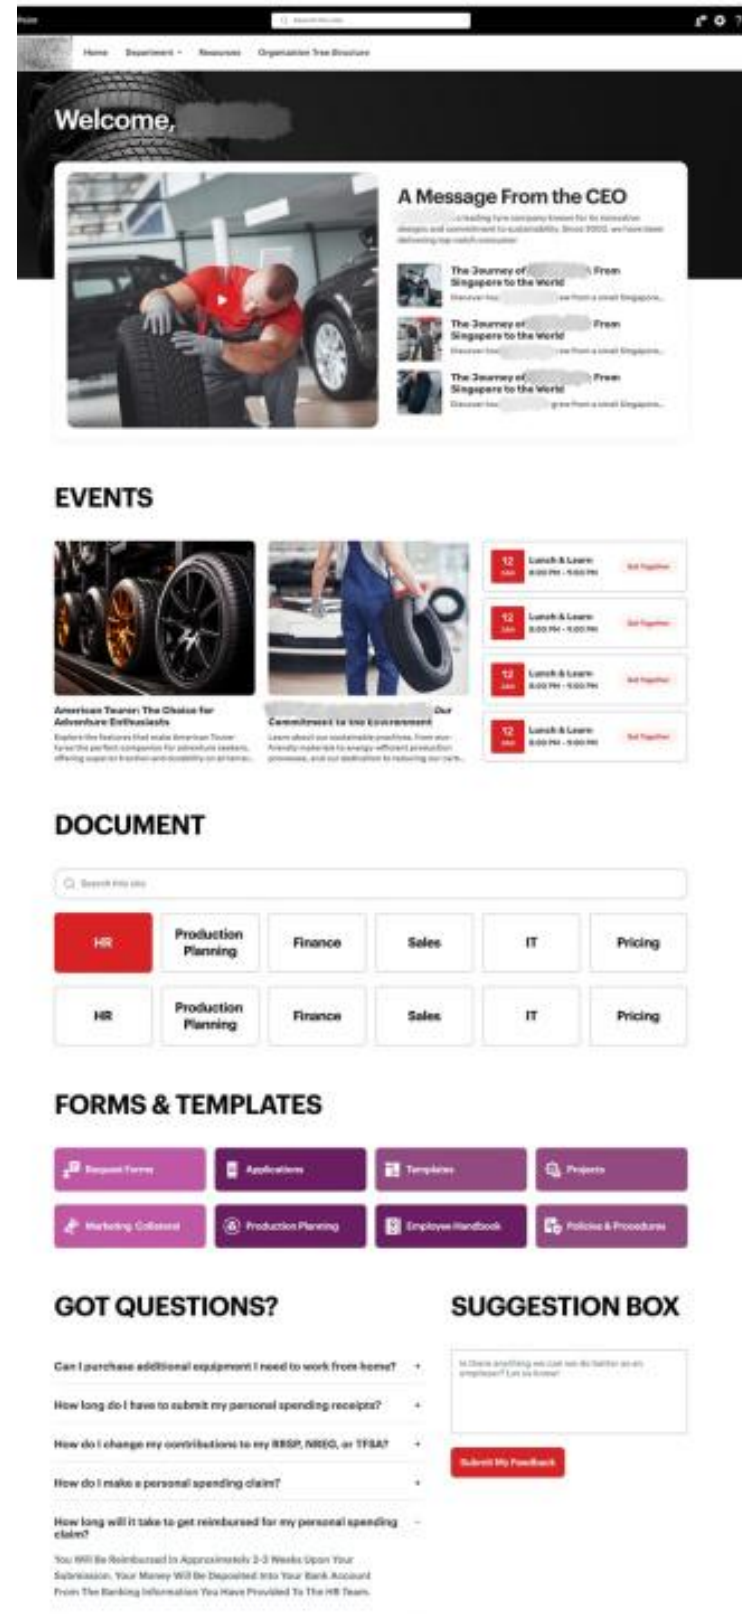

Our solutions feature a wide range of modern page layouts and interactive widgets including:

📅 Calendar, 🌤️ Weather, 📰 News, 🎯 Events, 🔗 Quick Links, 💬 Discussion Boards, and 📺 Sliders for dynamic content presentation.

We also specialize in developing custom widgets like 👤 Employee Directory, 📊 Surveys, and more—tailored to meet your unique organizational needs.

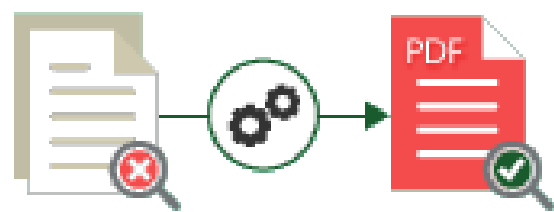

Our team is proficient in building both SPFx-based and Modern SharePoint Intranets, ensuring scalable, responsive, and user-friendly designs.

Empower your workforce with a digital workplace that's functional, intuitive, and built to evolve.

Robust Document Management Systems (DMS) Powered by SharePoint

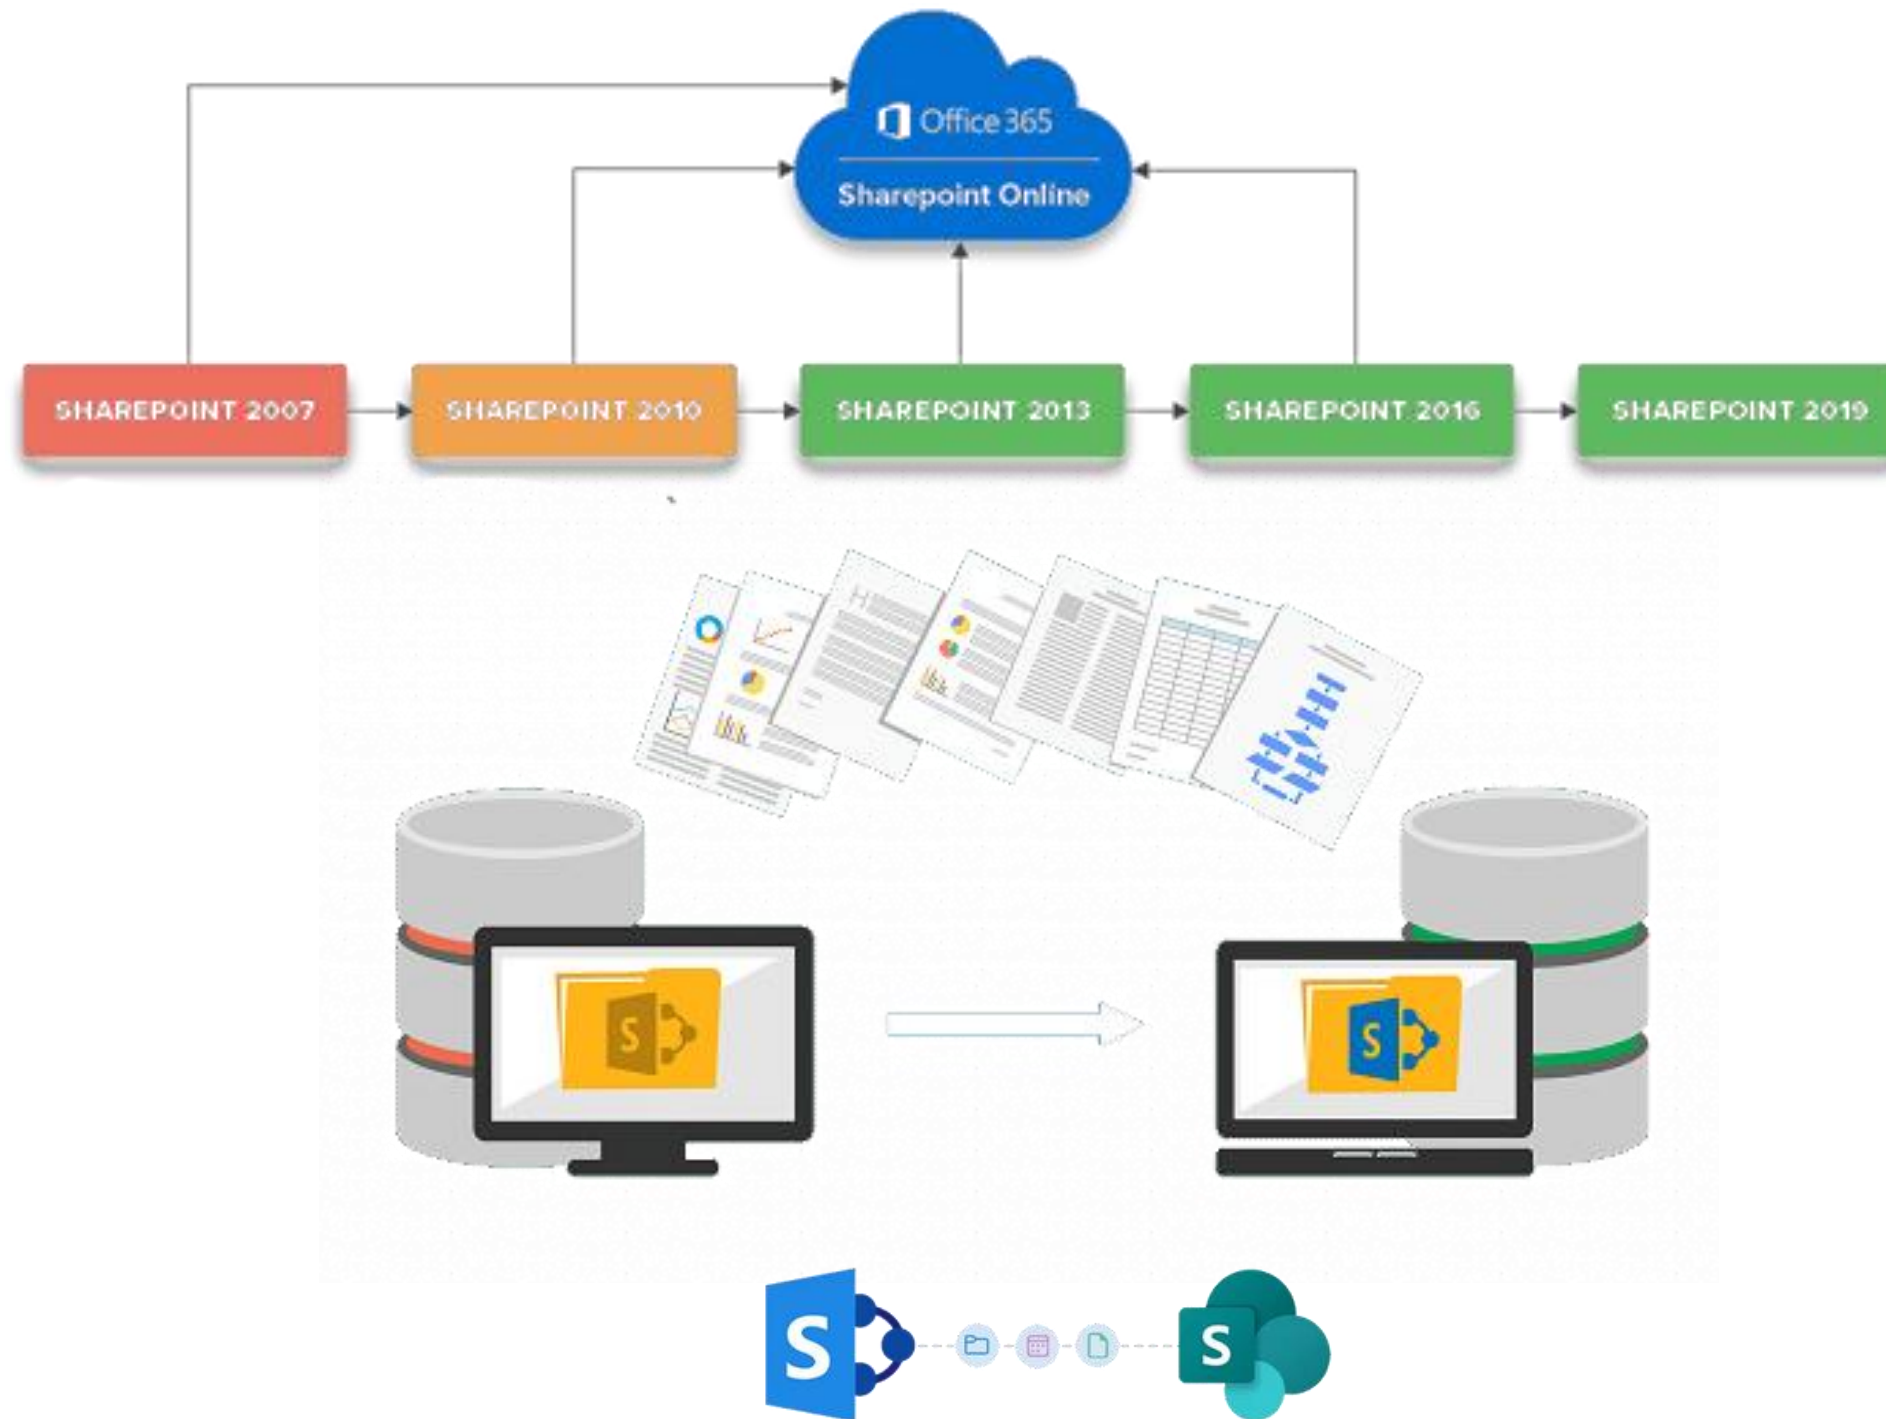

At Epicbliss, we specialize in building intelligent and secure Document Management Systems using SharePoint, tailored to streamline document storage, access, and governance.

Key features we deliver include:

- Seamless synchronization with OneDrive and local Windows folders
- Advanced metadata tagging, version control, and folder/document-level security
- Role-based permissions aligned with organizational hierarchies
- Workflow automation for approvals, notifications, and lifecycle management
- CRM integration for a connected and centralized document ecosystem.

Whether you need a scalable repository or a fully integrated enterprise document solution, Epicbliss ensures your DMS is efficient, compliant, and built for growth.

SharePoint Projects Delivered

Comprehensive SharePoint Migration Services with Zero Data Loss

At Epicbliss, we bring deep expertise in delivering smooth, reliable, and secure SharePoint migration projects, using trusted tools like Sharegate and Metalogix.

Our migration capabilities include:

- On-Premises to On-Premises
- On-Premises to Office 365 (SharePoint Online)

We ensure accurate migration of:

- Site Collections, Sites, and Pages
- Lists, Libraries, and Large Data Sets
- Permissions, Users, Groups, and Alerts
- Site Columns, Content Types, and Records
- Workflows and Automation Elements
- Branding and UI Customizations (JavaScript, altered menus, etc.)

Whether you're upgrading infrastructure or transitioning to the cloud, Epicbliss guarantees a seamless SharePoint migration experience—secure, scalable, and aligned with your business needs.

Automate and Optimize with Microsoft Flow (Power Automate)

At Epicbliss, we design and implement powerful Microsoft Flow (Power Automate) solutions that automate repetitive tasks, reduce manual errors, and enhance productivity across your organization.

Our Power Automate capabilities include:

-  Automated Workflow Creation – Triggered by events across SharePoint, Outlook, Dynamics 365, third-party apps
-  Email Notifications & Alerts – Real-time updates for approvals, changes, and deadlines
-  Document Management Automation – Auto-tagging, approval routing, and archiving in SharePoint
-  Approval Workflows – Multi-level approval processes for HR, finance, and operations
-  Third-Party Integration – Seamless connectivity with services like Teams, Slack, Salesforce, Dropbox, and more
-  Process Monitoring & Logging – Track flow executions and troubleshoot with detailed audit trails.

Epicbliss empowers your teams to work smarter, faster, and more efficiently.

Streamlined SharePoint Workflows & Dynamic Project Portals

At Epicbliss, we develop powerful, automated SharePoint workflows and intuitive project portals that simplify business processes and enhance team collaboration. Leveraging tools like SharePoint Designer, we deliver tailored solutions that align with your operational goals.

Our workflow solutions include:

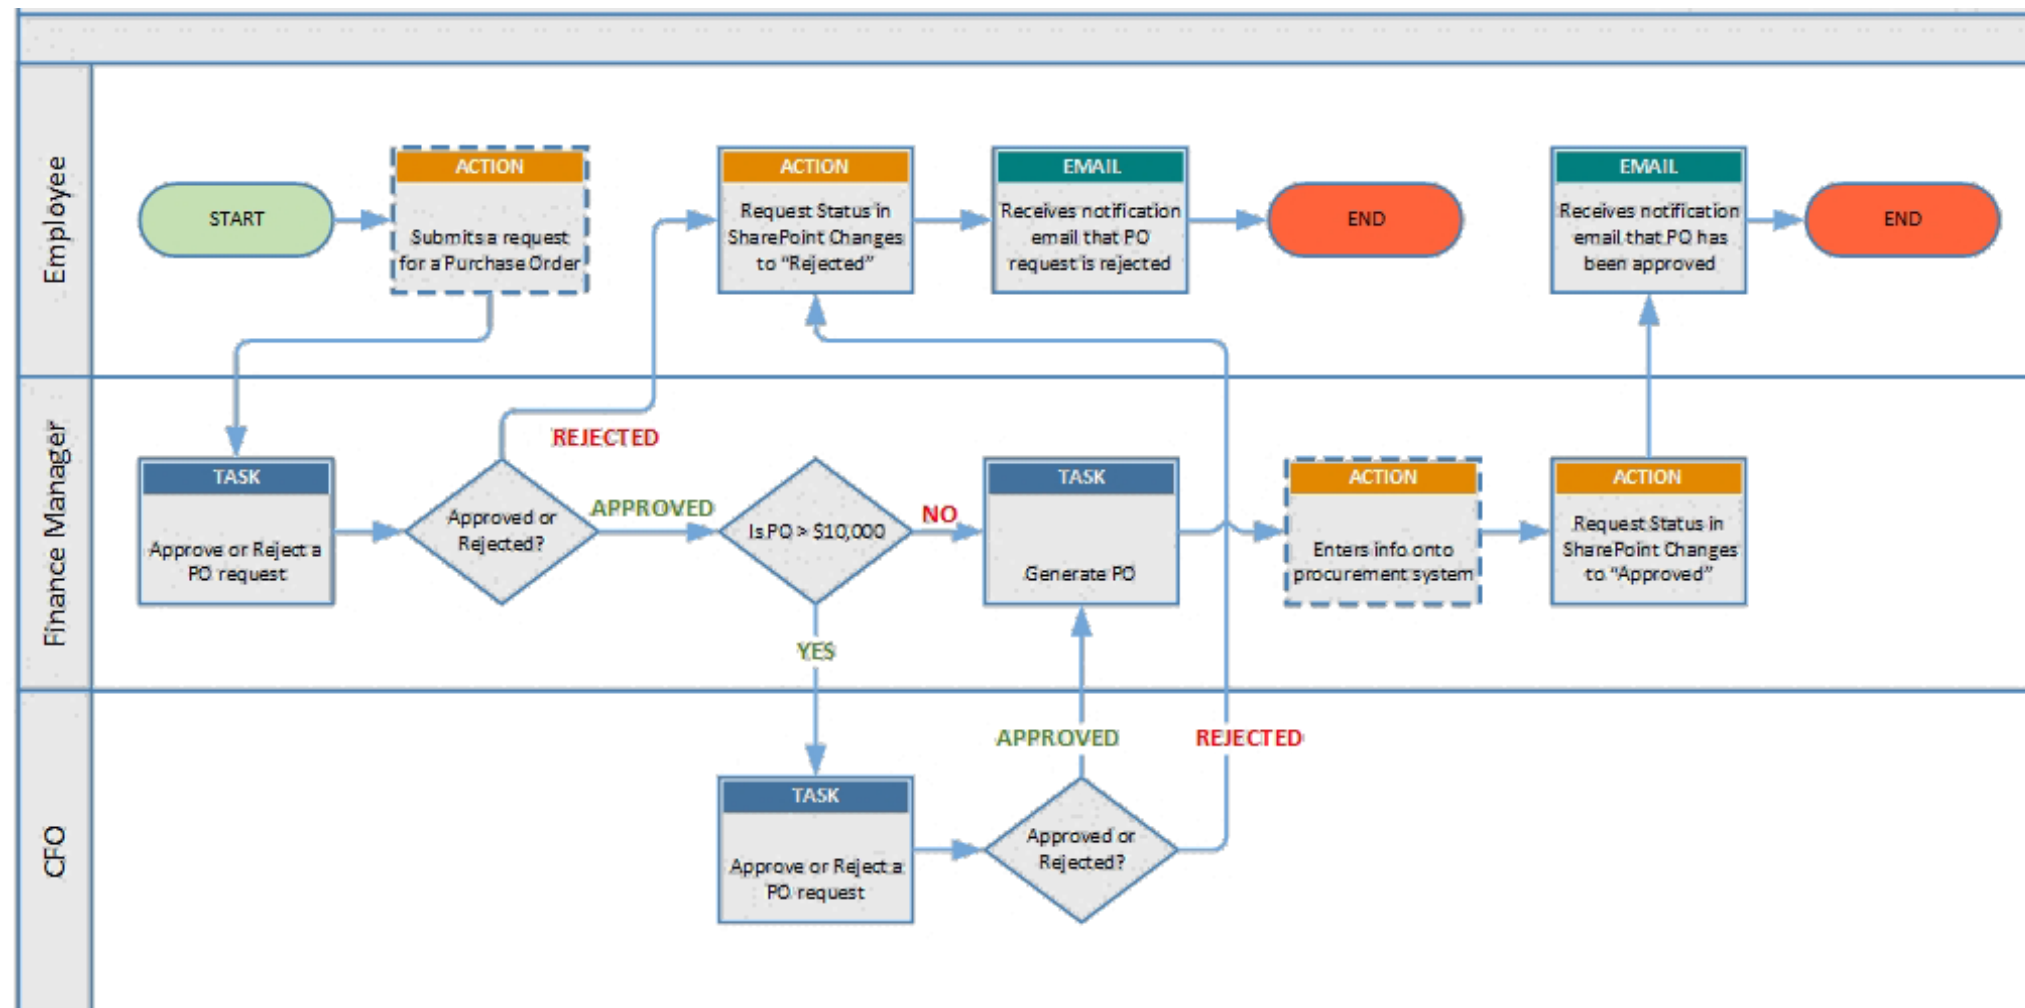

- ✓ Purchase Approval Workflows
- 🏠 Loan Management Automation
- 📄 Document Approval & Rejection Flows
- 📄 Invoice Approval Workflows

Our project portals are customized for various business units, including:

- 📁 Department Portals
- 👥 Client Portals
- 👤 HR Portals

Each portal features tab-based task views such as:

- ◆ Active Tasks
- ◆ Late Tasks
- ◆ Upcoming Tasks

Custom PowerApps Solutions for Business Efficiency & Automation

At Epicbliss, we specialize in building powerful, user-friendly PowerApps tailored to automate processes, enhance data input, and integrate seamlessly with your Microsoft ecosystem.

Key capabilities we've delivered include:

-  PowerApps + SharePoint Integration – Custom forms and business apps built on SharePoint lists
-  Excel-Based Apps – PowerApps using Excel sheets as the primary data source
-  Email & Meeting Automation – Apps that send emails and meeting invites directly from within PowerApps
-  Custom Connectors – Capture and save Pen Input and camera images to SharePoint as list attachments, documents, or email attachments
-  Flow Integration – PowerApps integrated with Microsoft Flow (Power Automate) to manage approvals, send notifications, and automate tasks

Whether it's digitizing forms, streamlining approvals, or integrating with broader systems, Epicbliss helps you unlock the full potential of PowerApps for business transformation.

Power BI Projects Delivered

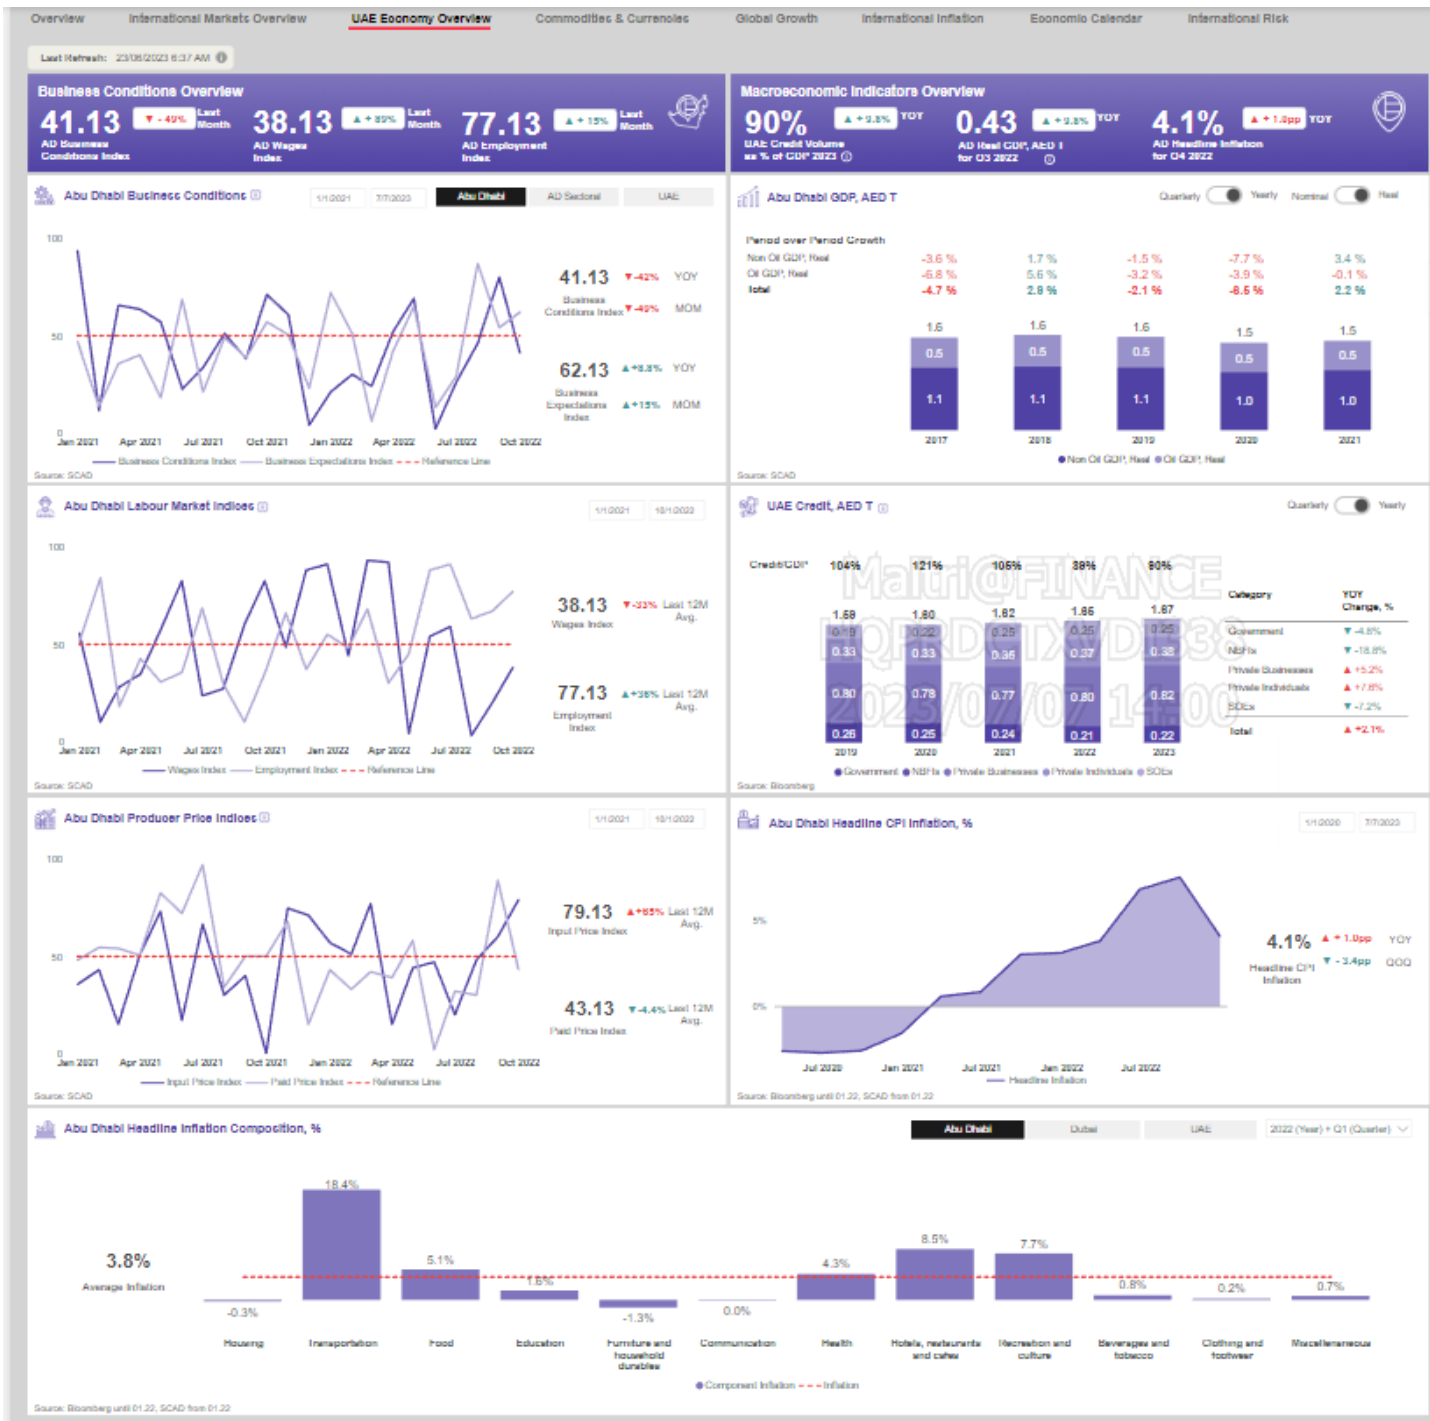

Transform Data into Insights with Power BI

At Epicbliss, we harness the power of Microsoft Power BI to help organizations visualize, analyze, and act on their data with clarity and confidence. Whether you're dealing with sales, finance, operations, or HR data — we deliver dashboards that empower decision-makers at every level.

Our Power BI Expertise Includes:

-  Custom Dashboards & Reports – Tailored visuals and KPIs that speak to your business objectives
-  Data Modeling & DAX – Strong foundations for scalable reports using advanced DAX measures and calculated tables
-  Multiple Data Source Integration – Seamless connections to SharePoint, Excel, SQL, Azure, APIs, Dynamics 365, and more
-  AI-Powered Insights – Key driver analysis, predictive analytics, and smart narratives
-  Scheduled Data Refresh & Automation – Keep your dashboards current with automatic refreshes and alerts
-  Row-Level Security (RLS) – Control who sees what with user-based access permissions
-  Drill-Down & Interactive Filtering – Deep dives into performance metrics with a single click

From executive dashboards to real-time operational reports, Epicbliss ensures every Power BI solution is fast, insightful, and business-ready.

Data-Driven Decision Making with Tableau

At Epicbliss, we specialize in designing powerful, interactive Tableau dashboards that turn complex data into clear, actionable insights. From raw data to executive-ready visualizations, we help organizations unlock the true potential of their data.

Our Tableau Services Include:

- ✓ Dashboard Development – Customized, interactive dashboards tailored to specific KPIs and business goals
- 🔄 Data Preparation & Cleaning – Using Tableau Prep for efficient data wrangling, merging multiple sources, and eliminating inconsistencies
- 🔗 Data Source Integration – Seamless connectivity with Excel, SQL databases, cloud sources, APIs, Salesforce, Redshift, and more
- 📊 Advanced Analytics & Visualizations – Drill-down charts, filters, trend analysis, forecasting, and calculated fields
- 📁 Storytelling with Data – Visual narratives that help stakeholders understand trends, spot issues, and make informed decisions
- 🔒 User-Level Security & Access Control – Role-based access for controlled sharing and publishing

Whether you're in healthcare, finance, retail, or education, Epicbliss delivers Tableau solutions that are scalable, intuitive, and insight-driven.

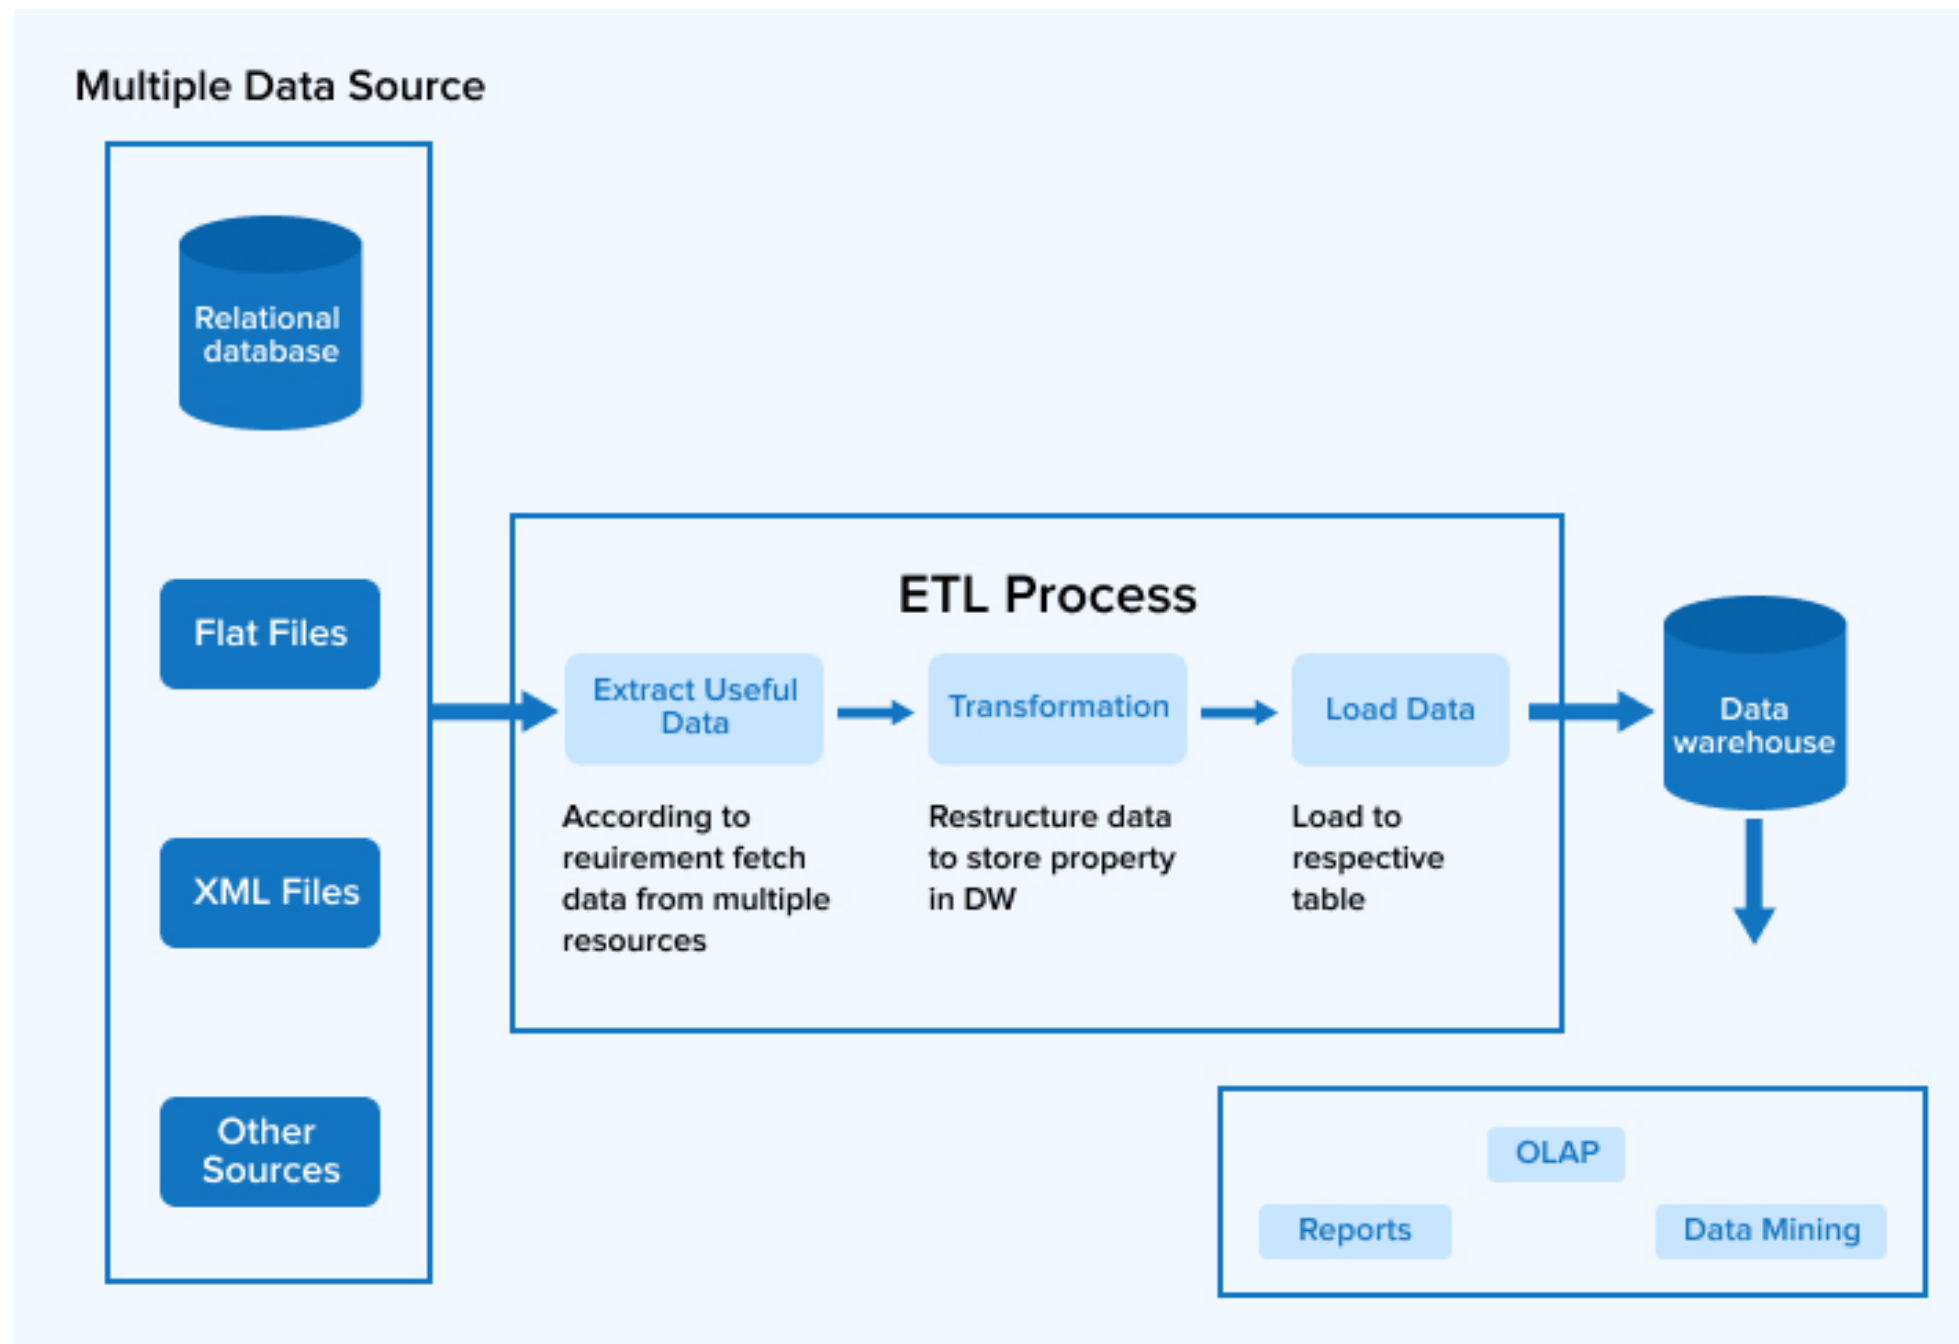

TOS Screen – ETL Development & Data Integration Project

In this project, Epicbliss was responsible for the complete ETL lifecycle, ensuring accurate and efficient data processing to support business intelligence and reporting.

Key Contributions Included:

-  Data Source Mapping – Identified and defined data sources and created Data Source Views for streamlined ETL integration
-  ETL Development – Designed, developed, deployed, and monitored SSIS packages for new processes; upgraded legacy DTS packages to SSIS for better performance and maintainability
-  Load Monitoring & Support – Managed and monitored full, incremental, and daily loads; supported all scheduled ETL jobs and resolved processing issues in real time
-  Documentation & Collaboration – Actively involved in requirement gathering, design analysis, and maintaining clear, structured project documentation

This project ensured a stable, scalable, and optimized ETL framework, laying a strong foundation for future data-driven initiatives.

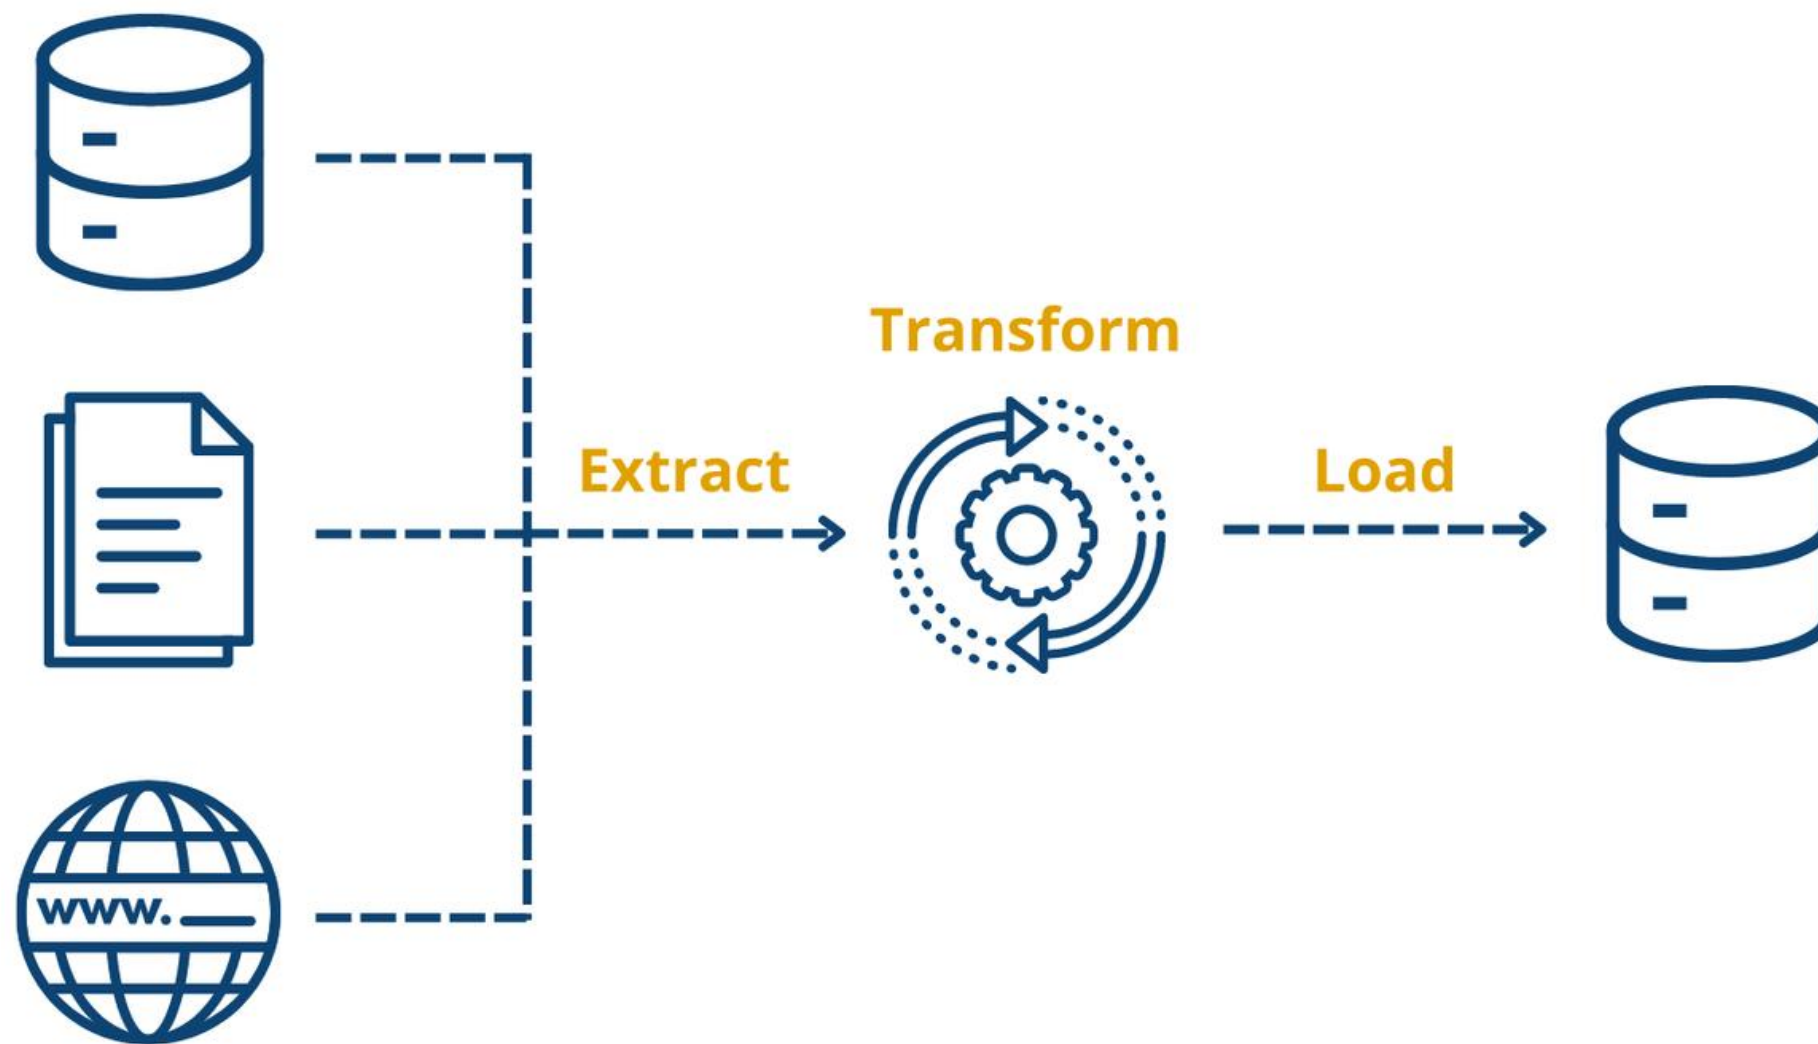

Informatica Screen – Data Integration & Salesforce ERP Extraction Project

In this project, Epicbliss played a key role in building an efficient ETL pipeline using Informatica to extract and process data from Salesforce ERP (Accounts object) and deliver it to downstream systems.

Key Responsibilities & Deliverables:

- 🔄 Data Extraction – Extracted data from the Salesforce ERP Accounts object using Informatica's Salesforce Connector
- 🤝 Business Collaboration – Interacted directly with business stakeholders to gather and clarify data requirements and filter conditions
- 🔧 ETL Development – Utilized Transformer, Aggregator, Sort, Filter, Copy, and Sequential File stages to build robust ETL jobs
- 📁 File Transfers – Collaborated with the Autosys team to set up automated file transfer jobs to the BW folder
- ✅ Testing & Validation – Coordinated with the BW team for unit testing and ensured all deliverables met business requirements
- 📄 Automation & Deployment – Developed shell scripts for Autosys job scheduling and managed change control by creating and submitting change tickets

Salesforce Projects Delivered

Comprehensive Salesforce Development & Automation Expertise

At Epicbliss, we bring strong Salesforce development capabilities tailored to help organizations maximize CRM performance, user experience, and automation across the platform.

A screenshot of the Salesforce interface showing an Opportunity record for 'Acme - 1250 Widgets'. The page displays a 'Delivery Status' section with a table of Asana tasks connected to this opportunity. The tasks include 'Send assets to ACME legal team', 'Provide details on security certifications', and 'Schedule integration demo'. Below this, there is a section for 'Asana projects connected to this opportunity (1)', showing two projects: 'Acme - 1250 Widgets CS Pre-Sales' (On Track, 78% progress) and 'Acme - 1250 Widgets CS Post-Sales' (At Risk, 16% progress). A 'Stage History (2)' sidebar on the right shows the progression of the opportunity through stages like 'Prospecting'.

Core Salesforce Expertise:

- Visualforce and Lightning Components (Aura Framework)
- APEX Classes and Triggers for custom logic and backend development
- API Integrations using REST and SOAP for seamless data exchange across platforms
- Sales Cloud & Service Cloud implementations for sales automation and customer support
- Salesforce Communities – Branded portals for partners, customers, and employees
- Pardot – Marketing automation to drive lead generation and engagement
- Data Management & Security – Ensuring data integrity, compliance, and governance
- Process Automation – Using Lightning Flow, Process Builder, and Workflow Rules for efficient, no-code solutions

RPA Projects Delivered

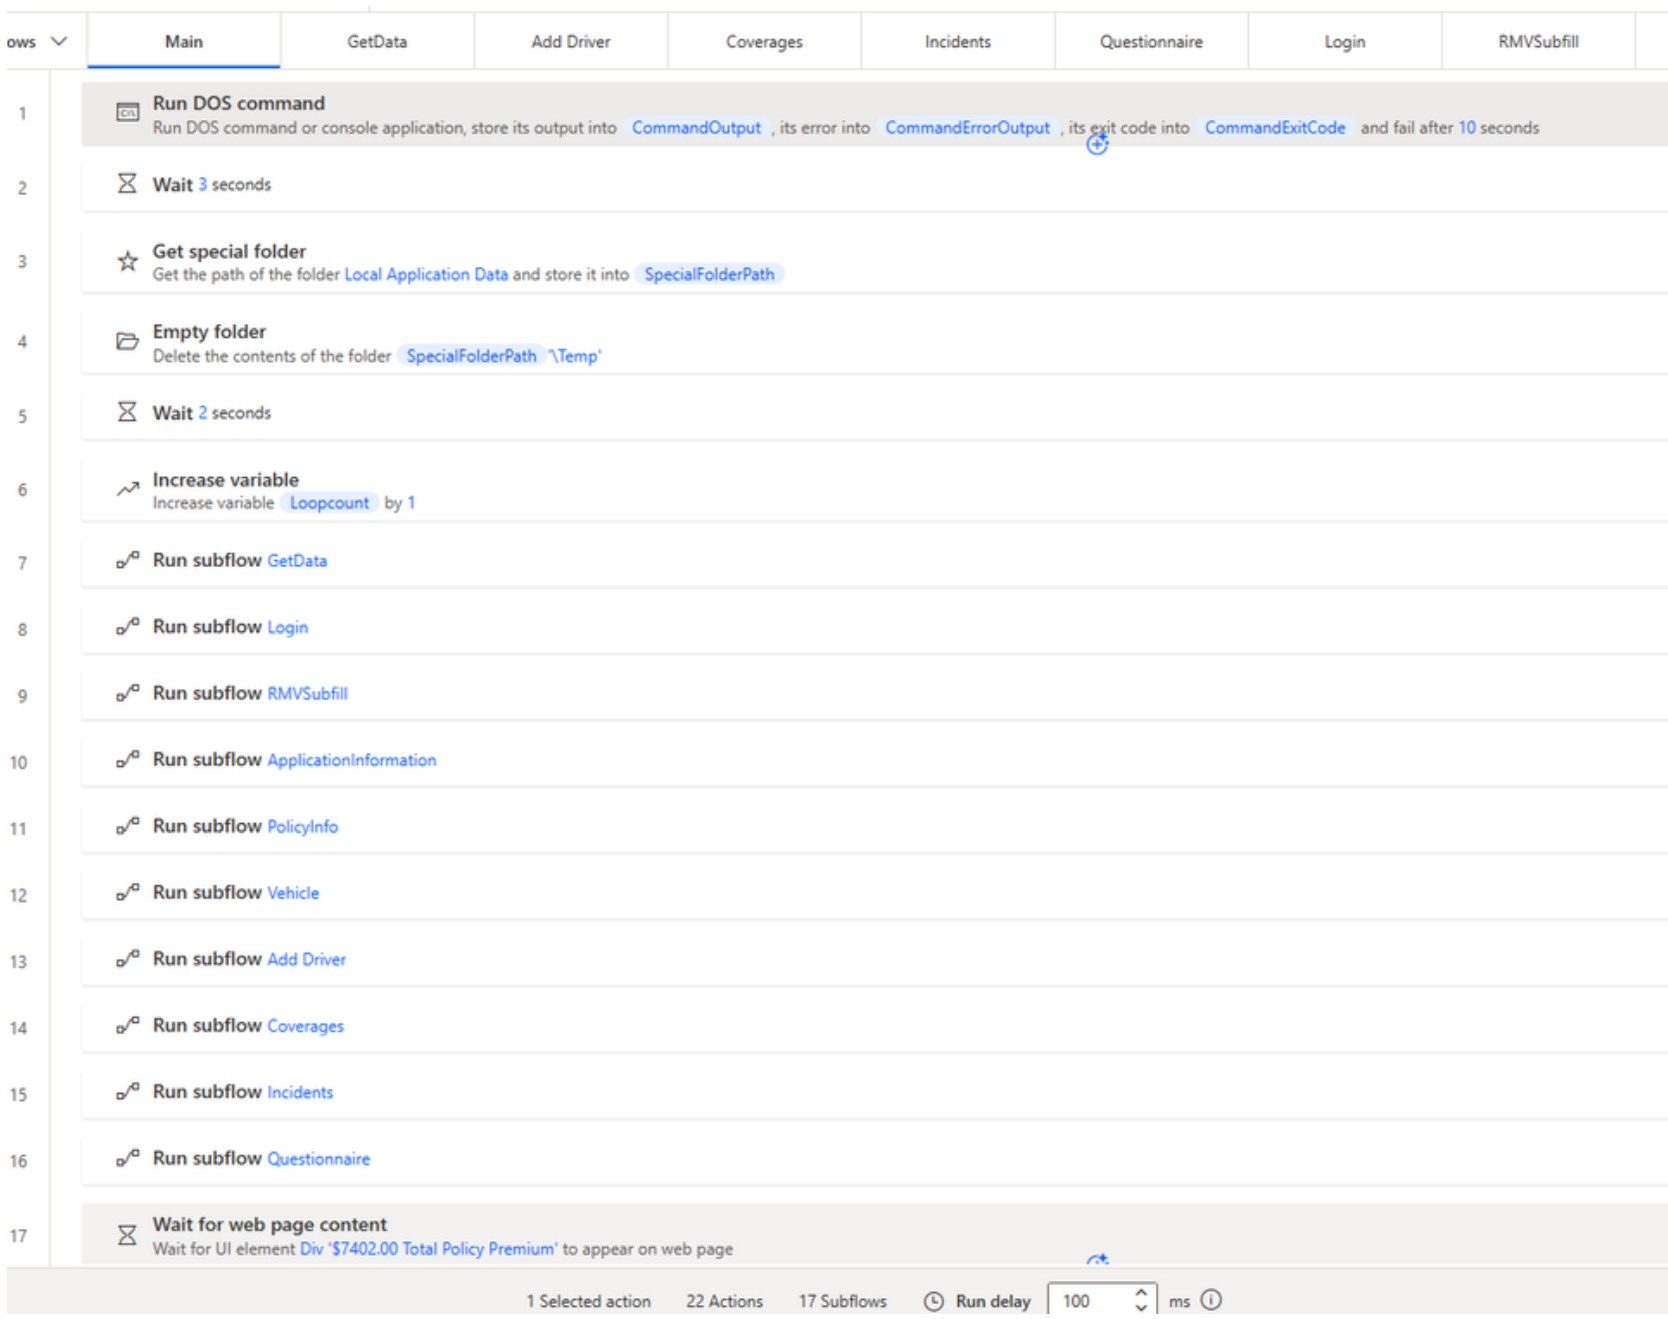

Accelerate Efficiency with Robotic Process Automation (RPA)

At Epicbliss, we empower businesses to automate repetitive, rule-based tasks using cutting-edge Robotic Process Automation (RPA) tools like UiPath and Automation Anywhere. Our RPA solutions streamline operations, reduce errors, and free up your team for higher-value work.

Our RPA Capabilities Include:

-  Process Assessment & Automation Design – Identifying automation opportunities and building scalable workflows
-  Bot Development – Creating attended and unattended bots for tasks like data entry, validation, system integration, and report generation
-  Integration with Legacy & Modern Systems – Seamless automation across ERPs, CRMs, web portals, Excel, and more
-  Monitoring & Maintenance – Continuous performance tracking, error handling, and optimization of bots
-  Compliance & Audit Readiness – Ensuring secure, rule-compliant automation for sensitive business processes

Whether you’re just starting with automation or scaling your RPA program enterprise-wide, Epicbliss helps you unlock productivity, accuracy, and cost savings through intelligent automation.

Mobile Apps Projects Delivered

Custom Mobile App Development for Modern Business Needs

At Epicbliss, we specialize in building high-performance, user-centric mobile applications that align with your business goals and deliver seamless experiences across platforms.

Our Mobile Development Expertise:

- iOS App Development – Native apps built with Swift and Objective-C for exceptional performance on Apple devices
- Android App Development – Scalable Android apps using Java and Kotlin for all device types
- Cross-Platform Development – Efficient development using Flutter to deploy apps on both iOS and Android from a single codebase
- UI/UX Design – Intuitive, responsive, and engaging designs focused on usability and brand identity
- API Integration – Real-time data sync and third-party integrations for enhanced functionality
- Offline Capability – Smart data caching and sync logic to support seamless offline use
- Push Notifications & Messaging – Keep users engaged with custom alerts and updates
- App Store Deployment – Full support in launching and managing your app on App Store and Google Play

End-to-End Oracle Solutions – Expertise Across Pillars, Modules & Services

◆ Oracle Pillar Specializations

We bring proven experience across 8 core Oracle pillars:

- Customer Experience (CX)
- Finance
- Supply Chain Management (SCM)
- Human Capital Management (HCM)
- Enterprise Performance Management (EPM)
- Analytics & Reporting
- Technology Extensions & Integrations

Our Oracle delivery model covers the entire lifecycle:

- Business Consulting
- Implementation
- Enhancement & Customization
- Upgrades & Migrations
- Global Rollouts
- Application Support
- Managed Services

📦 Oracle Module Expertise

We've successfully delivered projects across various Oracle modules including:

- Finance
- Procurement
- Manufacturing
- Inventory Management
- Order Management
- Warehouse Management
- Supply Chain Management
- Customer Relationship Management (CRM)
- Professional Services Automation (Service Resource Management)
- Workforce Management
- Human Resources Management
- Ecommerce
- Marketing Automation

Client Testimonials

- Real pleasure consulting with Ravi & Team Epicbliss to set up our company's entire SharePoint Intranet and portal. We will definitely be reaching out to team for future work to be done. - **Rachelle Glaccer (USA)**
- Overall Epicbliss delivered quality work. They have top-notch work ethics and a winning attitude. We recognize and appreciate your dedicated efforts. Thank you. - **Stephen Pean (Canada)**
- A+++. Very easy to work with and professional team Epicbliss - **Archie Patterson (Australia)**
- Ravi and team pack in terabytes of SharePoint and BI wisdom :-)
Are very clear in communication and can provide one-stop solution for everything SharePoint, database, data analytics or BI.
Look forward to working with them in future as well.
- **Marco (Germany)**
